HR Profile Management

1. HR Account Setup

This is for creating new HR profiles.

- **Employee ID:** Unique identifier for the HR personnel.
- **Full Name:** First name, middle name (optional) and last name.
- **Email Address:** Primary contact email (e.g.official company email).
- **Phone Number:** Contact phone number.
- **Department Assignment:** Dropdown or selection for assigning to a specific department
- **Job Title/Role:** The specific role within HR
- **Start Date:** Date when the HR personnel joined the company or assumed the HR role.
- **Manager/Reporting To:** Dropdown or search field to select their direct manager for hierarchy.
- **Profile Picture:** Option to upload a profile photo.

2. Role-based Access Control

This focuses on defining and assigning roles. While the setup for this is typically done by an administrator, the input fields would be for **defining** the roles and **assigning** them.

- **Role Name:** e.g., "Recruiter," "HR Manager," "Administrator"
- **Role Description:** A brief explanation of the responsibilities and permissions associated with the role.
- **Permissions Checklist:** A list of all available actions/features in the HR dashboard, with checkboxes to grant or deny access for this specific role

3. Multi-department Management

This feature is about handling multiple departments and teams. The input fields here would be for **creating and managing departments**.

- **Department Name:** (e.g., "Marketing," "Sales," "Engineering").
- **Department Head:** Dropdown or search field to select the head of the department.
- **Department Description:** A brief overview of the department's function.
- **Location:** Physical location of the department (if applicable).

4. Profile Verification

This involves verifying HR credentials. The input fields would be for the verification process itself.

- **Verification Status:** Dropdown with options like "Pending," "Verified," "Rejected."
- **Verifier/Approver:** Name or ID of the person performing the verification.
- **Verification Date:** Date of verification.
- **Comments/Notes:** Text area for any remarks regarding the verification process
- **Document Uploads:** Option to upload verification documents (e.g., ID proof, educational certificates).

5. Team Hierarchy

This is about managing the HR team structure and reporting relationships.

- **Employee Name (Dropdown):** Select the HR personnel whose hierarchy is being updated.
- **Direct Manager (Dropdown):** Select the direct manager for the selected employee.
- **Direct Reports (Multi-select Dropdown):** Select individuals who report directly to the selected employee.

6. Permission Management

This focuses on granular permission settings for different HR functions. This would typically be a part of the "Role-based Access Control" but could also be specific overrides.

- **User/Role Selection:** Dropdown to select an individual HR user or a defined HR role.
- **Function/Feature List:** A list of all modules or specific actions within the HR dashboard
- **Permission Level:** Checkboxes or radio buttons for each function

7. Audit Trail

This tracks all HR activities and decisions. This isn't about input fields for data collection, but rather **displaying** logged data.

- **Activity Type:** (e.g., "User Login," "Profile Updated," "Leave Approved," "Role Assigned").
- **User/Actor:** Who performed the action.
- **Timestamp:** Date and time of the action.
- **Affected Record/Entity:** What record was modified or affected (e.g., "Employee ID 123," "Department Sales").
- **Changes Made:** Details of the changes (e.g., "Changed email from X to Y," "Approved leave for John Doe").

8. Professional Development

This tracks HR team skill development and training.

- **Employee Name (Dropdown):** Select the HR personnel.
- **Training Name/Program:** Name of the training course or program.
- **Training Provider:** Who conducted the training.
- **Start Date:** Date training began.
- **End Date:** Date training ended.
- **Status:** (e.g., "Completed," "In Progress," "Scheduled").
- **Certification (Optional):** Whether a certification was obtained.
- **Skills Acquired/Improved:** Text area to list skills developed.
- **Training Cost:** (Optional) Financial cost of the training.
- **Feedback/Notes:** Text area for any relevant comments or feedback on the training.

Data Collection for HR Dashboard Overview

While the "HR Dashboard Overview" focuses on **displaying** insights, here's a look at the data that would be collected from other parts of the HR system or integrated from various sources to power each dashboard section:

1. Executive Summary

This section provides a high-level overview. The data here is an **aggregation** of many other data points.

- **Data Collected (from other modules):**
    - **Total Employees:** Count from Employee Overview.
    - **New Hires (e.g., last 30 days):** From Recruitment Pipeline data.
    - **Employee Turnover Rate:** Calculated from employee start/end dates.
    - **Open Positions:** From Recruitment Pipeline data.
    - **Average Time-to-Hire:** From Recruitment Pipeline data.
    - **Total Training Hours:** From Professional Development records.
    - **Compliance Status:** From Compliance records.
    - **Budget vs. Actual Spend:** From Budget Tracking.

2. Recruitment Pipeline

This visualizes where candidates are in the hiring process.

- **Data Collected (from recruitment forms/ATS):**
    - **Job Requisition ID:** Unique ID for the open position.
    - **Job Title:** Title of the position.
    - **Candidate Name:** Name of the applicant.
    - **Application Date:** When the candidate applied.
    - **Current Stage:** (e.g., Applied, Screened, Interviewed, Offer Extended, Hired, Rejected).
    - **Stage Entry Date:** Date the candidate entered the current stage.
    - **Interviewer Feedback Scores:** Scores from interviewers.
    - **Source:** Where the candidate came from (e.g., LinkedIn, job board, referral).
    - **Time in Stage:** Duration a candidate spent in each stage (calculated).

3. Employee Overview

This displays current status of students, interns, mentors, and staff.

- **Data Collected (from employee profiles/onboarding):**
    - **Employee Type:** (e.g., Full-time, Part-time, Intern, Student, Mentor).
    - **Start Date:** Date of joining.
    - **Department/Team:** Assigned department.
    - **Job Title:** Current role.
    - **Manager:** Direct reporting manager.
    - **Current Status:** (e.g., Active, On Leave, Resigned).
    - **Mentor/Mentee Assignment:** Who is mentoring whom.
    - **Skills/Qualifications:** Employee skills data.

4. Performance Metrics

This provides insights into HR department performance and efficiency.

- **Data Collected (from various HR operations):**
    - **HR Ticket Resolution Time:** Time taken to resolve HR queries/issues.
    - **HR Process Cycle Times:** Duration for key HR processes (e.g., onboarding time, payroll processing time).
    - **HR Team Workload:** Number of tasks assigned/completed per HR personnel.
    - **Recruitment Efficiency:** (e.g., Cost per hire, Quality of hire).

    - **Training Completion Rates:** Percentage of employees completing required training.
    - **Employee Satisfaction Scores (HR services):** From internal surveys.

5. Urgent Actions

This section highlights priority tasks needing immediate attention.

- **Data Collected (from various HR modules that generate alerts/tasks):**
    - **Task Type:** (e.g., "Employee Onboarding Pending," "Contract Renewal Due," "Leave Approval Needed," "Compliance Document Expiring").
    - **Due Date:** When the task needs to be completed.
    - **Assigned To:** Which HR personnel is responsible.
    - **Priority Level:** (e.g., High, Medium, Low).
    - **Associated Employee/Record:** Which employee or record the action pertains to.

6. Compliance Status

This tracks regulatory compliance and audit status.

- **Data Collected (from compliance management module):**
    - **Regulation Name:** (e.g., GDPR, local labor laws, industry-specific regulations).
    - **Compliance Status:** (e.g., Compliant, Non-compliant, Audit in Progress).
    - **Last Audit Date:** Date of the last compliance audit.
    - **Next Audit Due:** When the next audit is expected.
    - **Audit Findings:** Details of any non-compliance issues found.
    - **Action Plan:** Steps taken to address non-compliance.
    - **Document Version Control:** Tracking of updated compliance policies.

7. Budget Tracking

This monitors HR budget utilization and expense tracking.

- **Data Collected (from financial systems/HR budget module):**
    - **Budget Category:** (e.g., Recruitment, Training, Salaries, Benefits, HR Software).
    - **Allocated Budget:** Approved budget for the period.
    - **Actual Spend:** Amount spent to date.
    - **Remaining Budget:** Calculated (Allocated Budget - Actual Spend).
    - **Expense Details:** Individual expense entries (e.g., vendor, amount, date).
    - **Variance:** Difference between allocated and actual.

8. Trending Issues

This identifies emerging HR issues and concerns. This section would analyze data from various sources to spot patterns.

- **Data Collected (analysis of existing HR data):**
    - **Employee Feedback:** From surveys, grievance reports, exit interviews (categorized by topic).
    - **Absenteeism Rates:** Tracking employee attendance patterns.
    - **Employee Turnover Analysis:** Reasons for employee departures.
    - **Performance Review Trends:** Common strengths and weaknesses identified across teams.
    - **Recruitment Challenges:** (e.g., difficulty filling certain roles, high candidate dropout rates).
    - **Training Needs Assessments:** Identifying skill gaps.
    - **Grievances/Disputes Log:** Tracking types and frequency of employee issues.

Mentor Management System

1. Mentor Recruitment

This covers the end-to-end process of bringing new mentors into the system.

- **Mentor Application Form Data:**
    - **Personal Information**
    - **Professional Background:** Current Job Title, Company/Organization
    - **Mentorship Experience:** Previous mentoring roles (if any), preferred mentorship style, availability for mentoring (hours/week).
    - **Areas of Expertise:** Specific skills, domains, or subjects they can mentor in
    - **Reason for Mentoring:** Why they want to be a mentor.
    - **Resume/CV Upload:** For detailed professional history.
    - **References (Optional):** Contact details for professional references.
- **Recruitment Tracking Data (Internal Use):**
    - **Application Date:** Date application was received.
    - **Current Stage:** (e.g., Applied, Screened, Interviewed, Background Check, Onboarded, Rejected).
    - **Interviewer Notes:** Feedback from interviews.
    - **Background Check Status:** (e.g., Pending, Cleared, Issues).

2. Mentor Database

This is for comprehensive management of mentor information once they're onboarded.

- **Core Mentor Profile Data:**
    - **Mentor ID:** Unique identifier.
    - **Full Name:** As provided in recruitment.
    - **Contact Information:** Email, Phone.
    - **Emergency Contact:** Name, Relationship, Phone Number.
    - **Skills/Expertise:** Detailed list of their skills (often populated from Skill Assessment).
    - **Availability:** Detailed schedule, preferred mentoring methods (e.g., in-person, online, hybrid).
    - **Demographic Information (Optional):** Gender, Age Group, Location (for matching purposes, adhering to privacy policies).
    - **Language Fluency:** Languages they can mentor in.
    - **Internal Notes:** Any administrative notes about the mentor.
    - **Profile Picture:** Option to upload.

3. Skill Assessment

This evaluates and tracks mentor skills and competencies.

- **Skill Input Data:**
    - **Mentor ID/Name:** Select the mentor.
    - **Skill Category:** (e.g., "Technical Skills," "Soft Skills," "Domain Knowledge").
    - **Specific Skill Name:** (e.g., "Python Programming," "Leadership," "Project Management").
    - **Proficiency Level:** (e.g., Beginner, Intermediate, Advanced, Expert). This could be a dropdown or a rating scale (1-5).
    - **Assessment Date:** When the skill was assessed.
    - **Assessor (Optional):** Who assessed the skill (if applicable).
    - **Evidence/Certifications (Optional):** Upload relevant certificates or examples.

4. Performance Evaluation

This involves regular mentor performance reviews and feedback.

- **Evaluation Form Data:**
    - **Mentor ID/Name:** Select the mentor being evaluated.
    - **Evaluation Period:** (e.g., Q1 2025, Annual 2024).
    - **Evaluator:** Who is conducting the review (e.g., Program Manager, Self-evaluation, Student feedback aggregator).
    - **Performance Criteria Ratings:** Rating scales (e.g., 1-5 or "Needs Improvement" to "Exceeds Expectations") for:
        - Communication effectiveness.
        - Guidance quality.
        - Availability and responsiveness.
        - Impact on mentee's development.
        - Adherence to program guidelines.
    - **Strengths:** Text area for positive feedback.
    - **Areas for Improvement:** Text area for constructive criticism.
    - **Development Goals:** Future goals for the mentor.
    - **Overall Rating:** Overall performance score.
    - **Student Feedback Summary:** Aggregated feedback from mentees (often collected via separate student surveys).

5. Mentor Allocation

This involves strategically assigning mentors to students. While largely driven by algorithms, some manual input might be needed for exceptions or preferences.

- **Student Profile Data (from Student Management System):**
    - **Student ID/Name:**
    - **Learning Goals/Objectives:** What they want to achieve from mentoring.
    - **Preferred Skills/Expertise from Mentor:**
    - **Availability:**
    - **Demographic Information (for matching, adhering to privacy).**
- **Manual Assignment Input (for overrides or specific requests):**
    - **Mentor ID/Name**
    - **Student ID/Name**

    - **Assignment Date**
    - **Reason for Manual Assignment**

6. Capacity Planning

This optimizes mentor workload and student distribution. This is primarily a **reporting and analysis feature**, but the data it uses comes from other modules.

- **Data Collected (from Mentor Database & Allocation):**
    - **Mentor Availability:** From Mentor Database.
    - **Current Number of Mentees per Mentor:** From Mentor Allocation records.
    - **Mentor Workload Thresholds:** Configurable maximum mentees per mentor (an input field for system configuration).
    - **Student Waiting List:** Number of unassigned students.
    - **Mentoring Session Logs:** Number of sessions conducted by each mentor.

---

7. Career Development

This tracks mentor career progression and development plans.

- **Development Plan Data:**
    - **Mentor ID/Name:**
    - **Development Goal:** (e.g., "Improve coaching skills," "Gain expertise in AI").
    - **Action Plan:** Steps to achieve the goal (e.g., "Attend X training," "Read Y books").
    - **Target Completion Date:**
    - **Status:** (e.g., "Not Started," "In Progress," "Completed").
    - **Training/Course Taken:** Specific courses or workshops attended.
    - **Certifications Achieved:**

8. Compensation Management

This handles mentor salary, bonuses, and incentive tracking.

- **Compensation Data:**
    - **Mentor ID/Name:**
    - **Compensation Type:** (e.g., Hourly Rate, Fixed Stipend, Bonus, Incentive).
    - **Amount/Rate:** The monetary value.
    - **Payment Frequency:** (e.g., Monthly, Per Session, Quarterly).
    - **Payment Date:** When payment was made.
    - **Hours Logged (for hourly rates):** If applicable, tracked from session logs.

    - **Performance-based Incentive Triggers:** Criteria for bonuses (e.g., number of sessions, positive feedback score).
    - **Tax Information:** (e.g., PAN, bank account details - **sensitive data, requires high security**).

9. Contract Management

This manages the lifecycle of mentor contracts.

- **Contract Data:**
    - **Mentor ID/Name:**
    - **Contract Type:** (e.g., "Volunteer Agreement," "Consultant Agreement," "Employment Contract").
    - **Contract Start Date:**
    - **Contract End Date:**
    - **Contract Status:** (e.g., "Active," "Expired," "Under Review," "Terminated").
    - **Contract Document Upload:** Ability to upload the signed contract file.
    - **Renewal Date:** Next renewal date if applicable.
    - **Terms and Conditions Summary:** Key points of the contract.
    - **Termination Date (if applicable):**
    - **Reason for Termination (if applicable):**
    - **Reminders:** Setup for contract expiry reminders.

Advanced Mentor Allocation System

1. Intelligent Matching

- **Data Collected**
    - **Mentor Skills & Expertise:** From "Skill Assessment" in the Mentor Management System
    - **Mentor Professional Background:** Industry, years of experience, current role.
    - **Mentor Availability:** Hours per week, preferred days/times.
    - **Mentor Personality Traits:** Direct, Supportive, Hands-on - potentially from a self-assessment or onboarding questionnaire
    - **Student Learning Goals:** What the student wants to achieve learn a specific skill, career guidance, job search
    - **Student Preferred Skills/Expertise from Mentor:** What specific knowledge or experience they seek in a mentor.

2. Workload Balancing (Automatic workload distribution among mentors)

This ensures no mentor is overburdened. The system uses pre-defined limits and real-time data.

- **Input Fields (System Configuration/Settings):**
    - **Maximum Mentees per Mentor:** A numerical value set by administrators
    - **Weighting for Experience/Seniority:** (Optional) A setting that might allow more experienced mentors to handle more mentees
- **Data Collected (from Allocation & Session Tracking - *used by the system*):**
    - **Current Number of Active Mentees per Mentor:** Real-time count of assigned students.
    - **Average Session Duration:** If tracking session lengths.

3. Skill-based Assignment (Match mentors to students based on technical expertise)

This is a specific aspect of intelligent matching, focusing purely on skills.

- **Data Collected (from Mentor & Student Skill Profiles - *collected elsewhere*):**
    - **Mentor's Listed Skills:** A detailed list of what the mentor is proficient in, ideally with proficiency levels.
    - **Student's Desired Skills:** Skills the student wants to learn or be mentored on.

4. Geographic Considerations (Consider time zones and location for optimal matching)

This ensures practical and convenient matching across different locations.

- **Data Collected (from Mentor & Student Profiles - *collected elsewhere*):**
    - **Mentor's Primary Location:** City, State, Country.
    - **Mentor's Time Zone:** (e.g., IST, EST, GMT).
    - **Student's Primary Location:** City, State, Country.
    - **Student's Time Zone:**

---

5. Performance-based Allocation (Assign high-performing students to experienced mentors)

This uses performance data to make strategic assignments.

- **Data Collected (from Student Performance & Mentor Performance - *collected elsewhere*):**
    - **Student Performance Metrics:** (e.g., Academic grades, project completion rates, internal performance evaluations - from a student management system).
    - **Mentor Performance Ratings:** From "Performance Evaluation" in the Mentor Management System (e.g., overall effectiveness, positive feedback from mentees).
- **Input Fields (System Configuration/Rules):**

- **Performance Thresholds:** Define what constitutes "high-performing" for students and "experienced" for mentors (e.g., a student with an average grade > 85%, a mentor with an average rating > 4.5/5).

---

6. Preference Management (Handle mentor and student preferences in assignments)

This allows users to express their desired matching criteria.

- **Input Fields (on Mentor & Student Profile Forms):**
  - **Mentor Preferences:**
    - **Preferred Mentee Learning Style:** (e.g., independent learners, those needing hands-on guidance).
    - **Preferred Mentee Experience Level:** (e.g., Beginners, Intermediate professionals).
    - **Exclusion List:** Specific students they prefer *not* to mentor (with justified reasons).
  - **Student Preferences:**
    - **Preferred Mentor Industry:**
    - **Preferred Mentor Experience Level:** (e.g., someone with 5+ years experience).
    - **Gender Preference (Optional & Sensitive):** If legally and ethically permissible, and strictly for matching comfort.
    - **Exclusion List:** Specific mentors they prefer *not* to be assigned to.

7. Bulk Allocation (Efficiently manage large-scale mentor-student assignments)

This is a function that triggers the allocation algorithm for many users at once.

- **Input Fields (Administrative Interface):**
  - **Allocation Run Trigger:** A button or scheduled task to "Run Bulk Allocation."
  - **Filters/Criteria for Bulk Run:** (Optional) Select a specific group of students or mentors to include in the current bulk run (e.g., "Allocate all new students," "Reallocate all unassigned mentors").
  - **Allocation Strategy Selection:** (e.g., "Prioritize Skill Match," "Prioritize Workload Balance").

8. Reallocation System (Handle mentor changes and emergency reassignments)

This addresses situations where a mentor or student needs a new match.

- **Input Fields (Administrative Interface):**
    - **Reason for Reallocation:** Dropdown (e.g., "Mentor Unavailable," "Student Request," "Poor Match," "Performance Issue").
    - **Old Mentor (if applicable):** Select the mentor being reallocated from.
    - **Old Student (if applicable):** Select the student being reallocated.
    - **New Assignment Trigger:** A button to "Find New Match" or "Assign Manually."
    - **Emergency Flag:** Checkbox to mark an urgent reallocation, potentially prioritizing it.
    - **Comments/Notes:** Text area to explain the reallocation reason.

Student Lifecycle Management

1. Onboarding Process

This is for collecting initial student information and guiding them through the setup.

- **Student Application/Enrollment Form:**
    - **Personal Information:** Full Name, Date of Birth, Gender, Contact Email, Phone Number, Residential Address.
    - **Academic Information:** Previous Education Details (School/University, Degree/Program, Graduation Year), Academic Transcripts/Certificates Upload.
    - **Program/Course Details:** Desired Program/Course of Study, Start Date, Preferred Schedule (if applicable).
    - **Emergency Contact:** Name, Relationship, Phone Number.
    - **Identification Details:** National ID Number (e.g., Aadhar, Passport), Passport-sized Photo Upload.
    - **Source of Information:** How the student heard about the program/institution.
    - **Consent & Declaration:** Checkboxes for agreeing to terms and conditions, privacy policy.

2. Document Verification

This involves submitting and verifying necessary documents.

- **Document Upload Interface:**
    - **Document Type:** Dropdown
    - **File Upload:** Button to upload the actual document file (PDF, JPG, PNG).
    - **Document Status (Internal):** Field to track "Pending," "Verified," "Rejected" by an administrator.
    - **Verification Notes (Internal):** Text area for admin comments during verification
    - **Verification Date (Internal):** Date the document was verified.

3. Background Checks

This collects information required to perform background verifications.

- **Background Check Consent Form:**
    - **Full Name (as per ID):**
    - **Date of Birth:**
    - **Previous Addresses (last X years):** List of past addresses with dates.
    - **Consent Signature:** Digital signature or checkbox agreeing to background check.
- **Background Check Request Form (Internal/Integration):**
    - **Type of Check:** (e.g., "Criminal Record," "Educational Verification," "Employment History").
    - **Vendor Selection:** If using external services, select the background check provider.
    - **Status (Internal):** (e.g., "Initiated," "In Progress," "Completed - Clear," "Completed - Flagged").
    - **Report Upload (Internal):** Option to upload the final background check report.

4. Offer Letter Management

This section is primarily for generating and sending offer letters, so the input fields are for **creating** the offer letter content.

- **Offer Letter Generation Form (Internal):**
    - **Student Name:** Select from existing student records.
    - **Program/Course Offered:** Select the program.
    - **Enrollment Start Date:**
    - **Tuition Fees/Program Cost:** Numerical input.

    - **Scholarship/Financial Aid Details (if any):** Amount, terms.
    - **Terms and Conditions:** Text area for specific program terms.
    - **Acceptance Deadline:** Date by which the offer must be accepted.
    - **Offer Status (Internal):** (e.g., "Draft," "Sent," "Accepted," "Rejected," "Expired").
    - **Acceptance Date:** Date the offer was accepted by the student.

5. Joining Formalities

This handles the digital completion of paperwork after offer acceptance.

- **Digital Formalities Forms:**
    - **Acknowledgment of Policies:** Checkboxes for policies like "Code of Conduct," "IT Usage Policy," " "Anti-Harassment Policy" etc.
    - **Emergency Contact Update:** Re-confirmation or update of emergency contact details.
    - **Bank Account Details (for stipends/refunds, if applicable):** Account Number, IFSC Code, Bank Name.
    - **Medical Information (Optional/Sensitive):** Any allergies, pre-existing conditions that the institution should be aware of (with strict privacy controls).
    - **Photo Consent:** Consent for using photos for institutional purposes.
    - **Digital Signature:** For various documents requiring student's signature.

6. Probation Tracking

This monitors student performance during initial probationary periods.

- **Probation Period Setup (Internal):**
    - **Student Name:** Select the student.
    - **Probation Start Date:**
    - **Probation End Date:**
    - **Probation Status:** (e.g., "Active," "Completed Successfully," "Extended," "Terminated").
    - **Probation Goals:** Text area to define specific goals for the student during probation.
- **Probationary Review Form (Internal - filled by faculty/mentor):**
    - **Review Date:**
    - **Reviewer:** Name of the faculty/mentor.
    - **Performance Against Goals:** Rating scale or text area for each goal.
    - **Attendance Record:** (Pulled from attendance system).
    - **Engagement Level:** Rating scale or comments.

7. Performance Intervention

This identifies and addresses performance issues early.

- **Intervention Log Form (Internal - filled by faculty/admin):**
    - **Student Name:** Select the student.
    - **Issue Identified:** (e.g., "Low Grades," "Poor Attendance," "Lack of Engagement," "Behavioral Issue").
    - **Date Identified:**
    - **Intervention Type:** (e.g., "Counseling Session," "Academic Support," "Disciplinary Action," "Mentorship Assignment").
    - **Intervention Date:** Date the intervention took place.
    - **Action Plan:** Specific steps agreed upon with the student.
    - **Responsible Party:** Who is overseeing the action plan.
    - **Follow-up Date:** When to check progress.
    - **Status:** (e.g., "Open," "Resolved," "Ongoing").

8. Exit Process

This manages student completion and exit procedures.

- **Exit Request/Completion Form (Student/Internal):**
    - **Student Name:**
    - **Reason for Exit:** (e.g., "Program Completion," "Withdrawal," "Transfer," "Expulsion").
    - **Effective Exit Date:**
    - **Feedback/Exit Survey:** (Link to a separate survey or integrated questions):
        - Overall satisfaction with the program/institution.
        - Suggestions for improvement.
        - Reason for withdrawal (if applicable).
    - **Outstanding Dues/Clearance Status (Internal):** Checkboxes for library, finance, accommodation clearance.
    - **Certificate Issuance Date (for program completion):**
    - **Alumni Status Update:** Flag for moving student to alumni database.

Leave & Attendance Management

1. Attendance Monitoring

This feature involves real-time tracking, so it's less about direct input fields from users and more about **system configuration and automated data capture**.

- **System Configuration Inputs (for setup):**
    - **Attendance Device Integration:** Details for connecting to biometric scanners, card readers, or virtual check-in systems.
    - **Working Hours/Shift Timings:** Input fields to define standard working hours for different groups (e.g., "9:00 AM - 6:00 PM," "Morning Shift: 6 AM - 2 PM").
    - **Grace Period for Lateness:** (e.g., "10 minutes").
    - **Location Tracking Settings:** (If using geo-fencing for check-ins).
- **Automated Data Captured (not direct user input):**
    - **Employee/Student/Mentor ID:** Unique identifier.
    - **Date:**
    - **Check-in Time:**
    - **Check-out Time:**
    - **Location Data:** (If applicable, from GPS/IP).

2. Leave Application System

This involves a digital process for requesting and approving leave.

- **Leave Application Form (filled by student/mentor):**
    - **Applicant's Name/ID:** (Usually pre-filled).
    - **Leave Type:** Dropdown (e.g., "Sick Leave," "Casual Leave," "Earned Leave," "Maternity/Paternity Leave," "Bereavement Leave," "Study Leave").
    - **Start Date:** Date picker.
    - **End Date:** Date picker.
    - **Number of Days:** (Automatically calculated based on start/end dates, or manually entered for half-days).
    - **Reason for Leave:** Text area (e.g., "Fever," "Family Function," "Vacation").
    - **Attachment (Optional):** Upload medical certificates, supporting documents.
    - **Contact During Leave:** Phone number/email if different.
    - **Handover Notes (Optional):** Details on work delegated during absence.

- **Approval Workflow Fields (for manager/approver):**
    - **Approver's Comments:** Text area.
    - **Approval Status:**
    - **Approval Date:**
    - **Delegated Approver (if applicable):** Select alternate approver.

3. Leave Balance Tracking

This automatically calculates and tracks leave balances. While mostly automated, there are initial setup inputs.

- **Leave Policy Configuration (Internal/Admin setup):**
    - **Leave Type Name:** (e.g., "Casual Leave").
    - **Accrual Rate:** How many days are earned per month/year (e.g., "1.5 days/month," "18 days/year").
    - **Max Carry-over:** Maximum days that can be carried to next year.
    - **Max Consecutive Days:** Maximum days allowed for this leave type.
    - **Probation Period Eligibility:** When does eligibility for this leave type begin.
    - **Initial Leave Grant (for new joiners):** How many initial days are granted.
- **Individual Leave Balance Adjustments (Internal/Admin):**
    - **Employee/Student/Mentor ID:**
    - **Leave Type:**
    - **Adjustment Type:** (e.g., "Add," "Deduct").
    - **Number of Days to Adjust:**
    - **Reason for Adjustment:** Text area (e.g., "Policy change," "Manual correction").

4. Attendance Analytics

This provides detailed attendance patterns and trend analysis. This is a **reporting feature**, so it's about **displaying** data already collected. However, there might be inputs for generating specific reports.

- **Report Generation Inputs:**
    - **Time Period:** Date range picker (e.g., "Last Month," "Current Quarter," "Custom Range").
    - **Group/Department Filter:** Select specific teams or departments.
    - **Individual Filter:** Select specific student/mentor.
    - **Report Type:** Dropdown
    - **Export Format:** (e.g., "PDF," "Excel").

5. Absence Management

This handles unauthorized absences and attendance issues.

- **Unplanned Absence Logging (Internal/Admin):**
    - **Student/Mentor ID:**
    - **Date of Absence:**
    - **Type of Absence:** (e.g., "Uninformed Absence," "Late Arrival - Excessive," "Early Departure - Unauthorized").
    - **Reason (if known):** Text area.
    - **Action Taken:** (e.g., "Warning Issued," "Follow-up Call Made," "Marked as Absent Without Pay").
    - **Follow-up Date:**
- **Disciplinary Action Log (Internal):**
    - **Student/Mentor ID:**
    - **Date of Incident:**
    - **Nature of Incident:** (e.g., "Repeated Unauthorized Absence").
    - **Disciplinary Action:** (e.g., "Verbal Warning," "Written Warning," "Suspension").
    - **Issued By:** Admin/Manager Name.
    - **Date of Action:**
    - **Notes:**

---

6. Holiday Management

This manages company holidays and special leave policies.

- **Holiday Calendar Setup (Internal/Admin):**
    - **Holiday Name:** (e.g., "Republic Day," "Diwali," "Christmas").
    - **Date:** Date picker.
    - **Recurrence:** (e.g., "Annual," "One-time").
    - **Applicability:** (e.g., "All Employees/Students," "Specific Departments," "Specific Locations").
    - **Type of Holiday:** (e.g., "Paid Holiday," "Optional Holiday").
- **Special Leave Policy Setup (Internal/Admin):**
    - **Policy Name:** (e.g., "Exam Leave Policy," "Volunteer Day Policy").
    - **Description:** Details of the policy.

    - **Eligibility Criteria:**
    - **Max Days Allowed:**

7. Attendance Reporting

This provides comprehensive attendance reports and analytics. This is largely a **display/output feature**, similar to "Attendance Analytics."

- **Report Generation Inputs (similar to Attendance Analytics):**
    - **Report Period:** Start and End Dates.
    - **Filters:** By student/mentor, department, status (present, absent, late, on leave).
    - **Metrics to Include:** Checkboxes
    - **Output Format:** (e.g., "PDF," "CSV," "Interactive Dashboard").

8. Integration with Payroll

This facilitates seamless data transfer to payroll systems. This feature requires **configuration settings** rather than direct forms for everyday use.

- **Integration Settings (Internal/Admin):**
    - **Payroll System API Credentials:** Secure input for connecting to the payroll system.
    - **Data Mapping:** Configuration to map attendance fields to payroll fields (e.g., "Approved Leave Days" in attendance maps to "Paid Leave" in payroll).
    - **Data Export Frequency:** (e.g., "Daily," "Weekly," "Monthly").
    - **Rules for Unpaid Leave:** How unauthorized absences or excess leave impact payroll calculations.
    - **Audit Log for Integrations:** (To track successful/failed data transfers - not an input, but a crucial component).

Performance Management & Evaluation

1. Performance Review System

This is the core framework for evaluating performance.

- **Review Form (filled by Employee, Manager, Peers):**
    - **Employee Name/ID:** (Usually pre-filled).
    - **Review Period:** (e.g., Q1 2025, Annual 2024).
    - **Reviewer Name/Role:** (e.g., Manager, Peer, Self-Review).
    - **Overall Performance Rating:** Dropdown/Scale (e.g., "Needs Development," "Meets Expectations," "Exceeds Expectations").
    - **Strengths/Accomplishments:** Text area for specific achievements during the period.

    - **Areas for Development/Improvement:** Text area for constructive feedback and areas to grow.
    - **Goals Achieved:** Reference to set goals, with a status (e.g., "Achieved," "Partially Achieved," "Not Achieved").
    - **Feedback on Company Culture/Support:** (Optional) Employee's perspective.
    - **Employee Comments/Self-Assessment:** Text area for the employee's own reflections.
    - **Signatures:** Digital signatures of employee and manager.

2. Goal Setting & Tracking

This involves defining and monitoring individual and team objectives.

- **Goal Setting Form:**
    - **Goal Title:** Short, clear name for the goal.
    - **Goal Description:** Detailed explanation of what needs to be achieved.
    - **Goal Type:** Dropdown (e.g., "Individual," "Team," "Departmental," "Company").
    - **Aligned with (Parent Goal):** (Optional) Link to a higher-level goal for alignment.
    - **Metric/Key Result (KR):** How success will be measured
    - **Target Value:** The specific numerical target for the metric.
    - **Start Date:** Date picker.
    - **Due Date:** Date picker.
    - **Owner:** Who is responsible for achieving the goal.
    - **Status:** Dropdown
    - **Priority:** Dropdown (e.g., "High," "Medium," "Low").
    - **Comments/Notes:** Any additional context.
- **Goal Update Form (for tracking progress):**
    - **Progress Update:** Numerical input or percentage (e.g., "50% complete").
    - **Update Date:**
    - **Comments on Progress:** What's going well, challenges, next steps.

3. 360-Degree Feedback

This collects feedback from multiple stakeholders (peers, subordinates, managers, self).

- **Feedback Request Form:**
    - **Feedback Receiver:** The employee for whom feedback is requested.
    - **Feedback Provider:** The person providing feedback.
    - **Relationship to Receiver:** Dropdown (e.g., "Manager," "Peer," "Direct Report," "Self").
    - **Feedback Deadline:**
    - **Feedback Questions:** (These are the actual input fields for feedback):
        - Rating Scales: For specific competencies (e.g., "Communication," "Teamwork," "Problem-Solving," "Leadership") on a scale (e.g., 1-5 or "Strongly Disagree" to "Strongly Agree").
        - Open-ended Questions: Text areas for qualitative feedback (e.g., "What are [Employee's Name]'s greatest strengths?", "What could [Employee's Name] do to improve?", "Provide an example of when [Employee's Name] demonstrated [specific competency]").
    - **Confidentiality Acknowledgment:** Checkbox.

4. Performance Improvement Plans (PIPs)

This creates and tracks initiatives for improving performance.

- **PIP Creation Form (filled by Manager/HR):**
    - **Employee Name/ID:**
    - **Start Date:**
    - **End Date:**
    - **Reason for PIP:** Dropdown (e.g., "Consistent Low Performance," "Specific Skill Gap," "Behavioral Issue").
    - **Performance Gaps Identified:** Text area listing specific areas needing improvement.
    - **Measurable Objectives:** Clear, quantifiable goals for improvement.
    - **Action Plan/Steps:** Specific actions the employee needs to take.
    - **Support/Resources Provided:** What the company will do to help
    - **Consequences of Not Meeting Objectives:** Clear statement of outcomes.
    - **Review Dates:** Scheduled check-in dates.
    - **Status:** Dropdown
    - **Employee Acknowledgment:** Digital signature.

5. Skill Gap Analysis

This identifies development needs by comparing current skills against required skills.

- **Skill Assessment (Employee Self-Assessment/Manager Assessment):**
    - **Skill Category:**
    - **Skill Name:**
    - **Current Proficiency Level:** Dropdown/Scale
    - **Required Proficiency Level (for role):**
    - **Gap Identified:** (Calculated field based on current vs. required).
    - **Development Interest:** Checkbox if the employee is interested in developing this skill.
- **Role-Based Skill Matrix (Internal/Admin Configuration):**
    - **Job Role:**
    - **Required Skills for Role:** List of skills.
    - **Required Proficiency for each Skill:**

6. Succession Planning

This identifies and develops future leaders.

- **Succession Candidate Nomination Form (filled by Manager/HR):**
    - **Employee Name/ID:** The potential successor.
    - **Target Role(s):** Which future roles they are being considered for.
    - **Readiness Level:** Dropdown
    - **Current Performance Rating:** (Pulled from Performance Review System).
    - **Leadership Potential Rating:** Dropdown/Scale.
    - **Key Strengths Relevant to Target Role:** Text area.
    - **Development Gaps for Target Role:** Text area.
    - **Development Plan for Successor:** Specific actions to prepare them.
    - **Nominated By:**
    - **Nomination Date:**
- **Critical Role Definition (Internal/Admin):**
    - **Critical Role Name:**
    - **Key Competencies Required:**

7. Recognition Programs

This manages employee recognition and reward programs.

- **Nomination Form:**
    - **Nominator Name/ID:**
    - **Nominee Name/ID:**
    - **Recognition Program:** Dropdown (e.g., "Employee of the Month," "Spot Award," "Long Service Award").
    - **Award Category:** (e.g., "Innovation," "Teamwork," "Customer Service").
    - **Reason for Nomination:** Text area detailing how the nominee demonstrated the desired behavior/achievement.
    - **Impact of Contribution:** How their actions positively affected the company/team.
    - **Date of Contribution:**
- **Award Management (Internal/Admin):**
    - **Award Name:**
    - **Recipient:**
    - **Award Date:**
    - **Reward Type:** (e.g., "Monetary Bonus," "Gift Voucher," "Certificate,"
    - **Value/Amount:**
    - **Status:** (e.g., "Pending Approval," "Approved," "Disbursed").

---

8. Performance Analytics

This provides advanced analytics on performance trends and patterns. This is primarily a **reporting and visualization feature**, so the input fields are for **filtering and generating reports**.

- **Analytics Dashboard Filters:**
    - **Time Period:** Date range picker.
    - **Department/Team Filter:**
    - **Job Role Filter:**
    - **Performance Rating Filter:** (e.g., "Show 'Exceeds Expectations' only").
    - **Goal Status Filter:** (e.g., "Show 'At Risk' goals").
    - **Feedback Type Filter:** (e.g., "Manager Feedback," "Peer Feedback").
    - **Display Options:** Checkboxes to select which charts/metrics to show (e.g., "Performance Distribution," "Goal Attainment Rate," "Skill Gap Trends").

Certification & Compliance Management

1. Certificate Generation

This involves creating and distributing certificates automatically. The input fields are for setting up the **certificate template** and **triggering creation**.

- **Certificate Template Setup (Internal/Admin Configuration):**
    - **Certificate Name**
    - **Program/Course**
    - **Recipient Fields:** Placeholders for data to be pulled
    - **Issuing Authority:** Name of the organization or department issuing the certificate.
    - **Signature Field(s):** Placeholder for digital signatures
    - **Certificate ID Prefix/Pattern:** How certificates will be uniquely numbered
    - **Design Template Upload:** Ability to upload a graphic design for the certificate.
- **Certificate Issuance Trigger (Internal/Automated):**
    - **Recipient Selection:** (Often automatically triggered upon "program completion" or "training completion" status).
    - **Completion Date:** (Automatically pulled or manually entered if needed).
    - **Issuance Date:** Date the certificate is generated.

2. Certification Tracking

This monitors the progress and completion of certifications for individuals.

- **Certification Record Form (Internal/Admin or Self-Service by User):**
    - **Student/Mentor/Employee Name/ID:** Select the individual.
    - **Certification Name:** (e.g., "PMP Certification," "AWS Cloud Practitioner," "Cybersecurity Fundamentals").
    - **Issuing Body:** Organization that issues the certification.
    - **Date Obtained/Completed:** Date picker.
    - **Expiration Date:** Date picker (if applicable).
    - **Certification ID/Number:** Unique identifier on the certificate.
    - **Certification Document Upload:** File upload for the certificate copy.
    - **Status:** Dropdown (e.g., "Completed," "In Progress," "Planned," "Expired").
    - **Renewal Date (if applicable):**
    - **Notes:** Any relevant comments.

3. Compliance Monitoring

This ensures adherence to labor laws and regulations. This is largely a **dashboard/reporting feature**, but it requires definitions of the rules.

- **Regulation/Law Definition (Internal/Admin Configuration):**
    - **Regulation Name:** (e.g., "Minimum Wage Act," "GDPR," "Sexual Harassment Act").
    - **Description:** Brief explanation of the regulation.
    - **Applicability:** (e.g., "All employees," "Specific departments," "By location").
    - **Key Requirements/Obligations:** List of actionable items to comply.
    - **Review Frequency:** How often compliance with this regulation needs to be checked.
    - **Responsible Department/Person:** Who is accountable for this compliance area.
- **Compliance Checklist/Status Update (Internal/Admin):**
    - **Requirement Name:** (Pulled from defined regulations).
    - **Compliance Status:** Dropdown
    - **Last Checked Date:**
    - **Evidence Upload:** Supporting documents proving compliance.
    - **Action Required:** Text area if non-compliant.
    - **Due Date for Action:**

4. Audit Management

This helps prepare for and manage HR audits.

- **Audit Planning Form (Internal/Admin):**
    - **Audit Name/Purpose:**
    - **Audit Scope:** What areas/departments will be audited.
    - **Audit Start Date:**
    - **Audit End Date:**
    - **Auditor(s):** Name(s) of internal or external auditors.
    - **Status:** Dropdown (e.g., "Planned," "In Progress," "Completed").
    - **Required Documents:** Checklist of documents to prepare.
- **Audit Findings & Action Plan Form (Internal/Admin):**
    - **Finding Description:** What non-compliance or issue was identified.
    - **Severity:** Dropdown (e.g., "Critical," "Major," "Minor").
    - **Recommended Action:** Steps to address the finding.

    - **Responsible Person:** Who will implement the action.
    - **Target Completion Date:**
    - **Resolution Status:** (e.g., "Open," "Closed").
    - **Audit Report Upload:** Upload the final audit report.

5. Policy Management

This allows creating, updating, and distributing HR policies.

- **Policy Creation/Update Form (Internal/Admin):**
    - **Policy Title:** (e.g., "Leave Policy," "Work From Home Policy," "Code of Conduct").
    - **Policy Category:** Dropdown (e.g., "HR," "IT," "Finance").
    - **Policy Version Number:** (e.g., "1.0," "1.1").
    - **Effective Date:** Date picker when the policy comes into effect.
    - **Policy Content:** Rich text editor for the full policy text.
    - **Attachment(s):** Upload any supporting documents (e.g., legal documents).
    - **Review Date:** When the policy is scheduled for its next review.
    - **Status:** Dropdown (e.g., "Draft," "Approved," "Active," "Archived").
- **Policy Acknowledgment Tracking:**
    - **Employee/Student Name:** Who has acknowledged.
    - **Acknowledgment Date:**
    - **Digital Signature/Checkbox:** Proof of acknowledgment.

6. Training Compliance

This tracks mandatory training completion.

- **Mandatory Training Setup (Internal/Admin):**
    - **Training Name:** (e.g., "Sexual Harassment Prevention," "Data Privacy Training," "Fire Safety").
    - **Required For:** Dropdown (e.g., "All Employees," "Specific Departments," "New Hires").
    - **Due Date for Completion:**
    - **Frequency:** (e.g., "Annually," "One-time").
    - **Training Material Upload/Link:** Link to training resources.
- **Training Completion Record (Automated from LMS or Manual Input):**
    - **Employee/Student Name/ID:**
    - **Training Name:**

    - **Completion Date:**
    - **Score/Result (if applicable):**
    - **Certificate of Completion Upload:**

7. Documentation Control

This provides centralized document management and version control.

- **Document Upload Form (Internal/Admin/Authorized Users):**
    - **Document Title:** Descriptive name of the document.
    - **Document Type:** Dropdown (e.g., "Policy," "Procedure," "Contract," "Template,")
    - **Department/Category:** Where the document belongs.
    - **Version Number:** (Auto-incrementing, but can be manually set for initial upload).
    - **Upload File:** Button to select the document file.
    - **Keywords/Tags:** For easy searching.
    - **Author:** Who created the document.
    - **Approval Workflow:** (If documents need approval before publishing).
    - **Access Permissions:** Who can view/edit the document.
- **Version History (Automated):**
    - **Version Number:**
    - **Date Modified:**
    - **Modified By:**
    - **Changes Summary:**

8. Regulatory Reporting

This generates reports for regulatory compliance. This is primarily a **reporting feature**, so the input fields are for **filtering and generating reports**.

- **Report Generation Inputs:**
    - **Report Type:** Dropdown (e.g., "Annual Compliance Report," "Training Compliance Summary," "Audit Readiness Report").
    - **Reporting Period:** Date range picker.
    - **Regulatory Body:** (e.g., "Labor Department," "Data Protection Authority").
    - **Filters:** By department, compliance status, policy status.
    - **Export Format:** (e.g., "PDF," "Excel," "CSV").
    - **Scheduled Reporting:** Option to set up recurring report generation.

Recruitment & Hiring Management

1. Job Posting Management

This involves creating and managing job advertisements across various platforms.

- **Job Posting Creation Form:**
    - **Job Title:** (e.g., "Software Developer," "Marketing Associate").
    - **Department:** Dropdown to select the hiring department.
    - **Job Location:** Text field (e.g., "Nagpur, India," "Remote").
    - **Employment Type:** Dropdown (e.g., "Full-time," "Part-time," "Contract," "Internship").
    - **Job Description:** Rich text editor for a detailed explanation of the role, responsibilities, and qualifications.
    - **Key Responsibilities:** Bulleted list or text area.
    - **Required Skills/Qualifications:** Checkboxes, multi-select dropdowns, or text area for essential skills (e.g., "Python," "Communication," "Minimum 3 years experience").
    - **Preferred Skills/Qualifications:** (Optional) Similar input types for desirable skills.
    - **Experience Level:** Dropdown (e.g., "Entry-level," "Mid-level," "Senior," "Manager").
    - **Salary Range (Optional):** Numerical input for lower and upper bounds.
    - **Application Deadline:** Date picker.
    - **Hiring Manager:** Dropdown to select the manager responsible for this hiring.

    - **Number of Openings:** Numerical input.
    - **Status:** Dropdown (e.g., "Draft," "Open," "Closed," "On Hold").
    - **External Posting Platforms:** Checkboxes for platforms to publish to (e.g., "LinkedIn," "Indeed," "Company Website").

2. Applicant Tracking

This tracks candidates through the entire recruitment process.

- **Candidate Profile Creation (Manual Entry/Resume Parsing):**
    - **Applicant Name:** First Name, Last Name.
    - **Contact Information:** Email, Phone Number, LinkedIn Profile URL (optional).
    - **Current Stage:** Dropdown
    - **Source:** Dropdown (e.g., "LinkedIn," "Referral," "Job Board," "Company Website").
    - **Application Date:** Date picker.
    - **Resume/CV Upload:** File upload.
    - **Cover Letter Upload (Optional):** File upload.
    - **Job Applied For:** Link to the specific job posting.
    - **Internal Notes:** Text area for recruiter/hiring manager comments.

---

3. Interview Scheduling

This automates interview scheduling and coordination.

- **Interview Request/Scheduling Form:**
    - **Candidate Name:** Select from applicant tracking.
    - **Interviewers:** Multi-select dropdown to select interview panel members.
    - **Interview Type:** Dropdown
    - **Preferred Dates/Times (Candidate):** Input for candidate's availability.
    - **Available Slots (Interviewer):** Display of available slots from interviewer calendars.
    - **Interview Date & Time:** Date and time picker.
    - **Interview Location/Mode:** Dropdown
    - **Meeting Link (for virtual):** Auto-generated or manually entered.
    - **Interview Duration:** (e.g., "30 mins," "60 mins").
    - **Agenda/Topics:** Text area.
    - **Status:** Dropdown

4. Candidate Evaluation

This involves comprehensive candidate assessment and scoring.

- **Interview Feedback Form:**
    - **Candidate Name:** (Pre-filled).
    - **Interviewer Name:** (Pre-filled).
    - **Interview Date:** (Pre-filled).
    - **Evaluation Criteria:** Rating scales (e.g., 1-5 or "Poor" to "Excellent") for:
        - Technical Skills
        - Problem-Solving
        - Communication
        - Teamwork/Collaboration
        - Cultural Fit
        - Motivation/Enthusiasm
    - **Strengths:** Text area.
    - **Areas for Development/Concerns:** Text area.
    - **Recommendation:** Dropdown (e.g., "Hire," "Strong Hire," "Consider for another role," "No Hire").
    - **Overall Comments:** Text area.
    - **Score:** (Calculated based on ratings).

5. Background Verification

This involves automated background check processes.

- **Background Check Request Form (Internal):**
    - **Candidate Name/ID:**
    - **Type of Check:** Dropdown (e.g., "Criminal History," "Education Verification," "Employment Verification," "Reference Checks").
    - **Vendor:** Dropdown to select the background check service provider.
    - **Consent Status:** Checkbox confirming candidate consent has been obtained.
    - **Status:** Dropdown (e.g., "Initiated," "In Progress," "Completed - Clear," "Completed - Minor Issues," "Completed - Major Issues").
    - **Report Upload:** File upload for the final background check report.
    - **Notes:** Any specific instructions or findings.

6. Offer Management

This generates and tracks job offers and negotiations.

- **Offer Creation Form:**
    - **Candidate Name:** Select from applicant tracking.
    - **Job Title Offered:** (Pre-filled from job posting, or can be adjusted).
    - **Base Salary:** Numerical input.
    - **Bonus/Incentive (Optional):** Numerical input.
    - **Benefits Package:** Text area or checkboxes for specific benefits (e.g., "Health Insurance," "PF," "Paid Time Off").
    - **Start Date:** Date picker.
    - **Reporting Manager:** Select the direct manager.
    - **Offer Expiration Date:** Date picker.
    - **Offer Letter Template:** Dropdown to select a pre-designed template.
    - **Offer Status:** Dropdown (e.g., "Draft," "Sent," "Accepted," "Rejected," "Negotiating," "Withdrawn").
    - **Negotiation Notes:** Text area to log negotiation details.
    - **Date Accepted/Rejected:** Date picker.
    - **Reason for Rejection (if applicable):** Text area/dropdown.

7. Recruitment Analytics

This analyzes recruitment metrics and effectiveness. This is a **reporting and visualization feature**, so input fields are primarily for **filtering and generating reports**.

- **Analytics Dashboard Filters:**
    - **Time Period:** Date range picker (e.g., "Last Quarter," "This Year").
    - **Department:** Multi-select dropdown.
    - **Job Title:** Multi-select dropdown.
    - **Source:** Multi-select dropdown.
    - **Metrics Selection:** Checkboxes for metrics to display (e.g., "Time to Hire," "Cost per Hire," "Source of Hire," "Candidate Conversion Rates," "Interview Pass Rates").
    - **Export Options:** Button to export data (CSV, PDF).

8. Vendor Management

This manages recruitment agencies and external vendors.

- **Vendor Profile Form:**
    - **Vendor Name:** (e.g., "ABC Recruitment Agency").
    - **Contact Person:** Name, Email, Phone.
    - **Service Provided:** Dropdown (e.g., "Recruitment Services," "Background Checks," "Assessment Tools").
    - **Contract Start Date:**
    - **Contract End Date:**
    - **Contract Document Upload:** File upload.
    - **Payment Terms:** Text area.
    - **Performance Rating (Internal):** Rating scale for vendor performance.
    - **Notes:** Any specific terms or history.
- **Invoice Tracking (for vendors):**
    - **Invoice Number:**
    - **Amount:**
    - **Date Received:**
    - **Payment Due Date:**
    - **Payment Status:** (e.g., "Pending," "Paid").
    - **Associated Job Posting/Candidate:** (Link to relevant records).

Communication & Collaboration Tools

1. Internal Communication

This allows broadcasting messages to specific groups or individuals.

- **Message Creation Form:**
    - **Sender:** (Pre-filled, usually the HR user).
    - **Recipient Type:** Dropdown (e.g., "All Employees/Students," "Specific Groups/Departments," "Individual").
    - **Recipient Selector:** Multi-select dropdown or search field to choose specific individuals or groups (if "Specific Groups/Departments" or "Individual" is selected).
    - **Subject Line:** Text input for the message subject.
    - **Message Content:** Rich text editor for the body of the message.
    - **Priority Level:** Dropdown (e.g., "Normal," "High," "Urgent").

    - **Attachment(s):** File upload button.
    - **Send Date/Time:** Date and time picker (for immediate send or scheduling).
    - **Confirmation:** Checkbox to confirm sending.

2. Email Campaign Management

This helps create and manage email campaigns (e.g., for onboarding, benefits, or important announcements).

- **Email Campaign Creation Form:**
    - **Campaign Name:** Text input (e.g., "New Employee Onboarding Series," "Annual Benefits Enrollment").
    - **Sender Name:** Text input (e.g., "HR Department," "KickstartSkills Team").
    - **Sender Email Address:** Text input (e.g., "hr@kickstartskills.com").
    - **Recipient List/Segment:** Dropdown or selector to choose target audience (e.g., "New Hires (last 30 days)," "All Mentors," "Specific Department").
    - **Email Template:** Dropdown to select a pre-designed email layout.
    - **Subject Line:** Text input.
    - **Email Body:** Rich text editor for the email content.
    - **Call-to-Action (CTA) Button Text:** Text input (e.g., "Learn More," "Enroll Now").
    - **CTA Link:** URL input for where the button leads.
    - **Attachments (Optional):** File upload button.
    - **Schedule Date/Time:** Date and time picker for sending.
    - **Tracking Options:** Checkboxes for "Open Rate Tracking," "Click Rate Tracking."

3. Notification System

This automates notifications for various HR processes. Input fields are for **configuring** these automated notifications.

- **Notification Rule Setup Form (Internal/Admin):**
    - **Notification Event:** Dropdown (e.g., "Leave Request Submitted," "Performance Review Due," "Certificate Issued," "New Policy Published").
    - **Trigger Condition:** (e.g., "Status changes to 'Pending Approval'," "Due date is in 7 days").
    - **Recipient(s):** Dropdown/Selector (e.g., "Manager of Applicant," "Employee," "HR Admin," "Specific Role").
    - **Notification Channel:** Checkboxes (e.g., "Email," "In-App Notification," "SMS").
    - **Notification Title:** Text input for the notification's headline.

    - **Notification Message:** Text area with placeholders (e.g., "Your leave request for {{start_date}} is {{status}}").
    - **Priority:** Dropdown (e.g., "Standard," "Urgent").
    - **Frequency/Repetition:** (e.g., "Once," "Daily until actioned").
    - **Status:** Toggle (e.g., "Active," "Inactive").

4. Discussion Forums

This facilitates discussions on HR topics and policies.

- **New Discussion Topic Form:**
    - **Topic Title:** Text input (e.g., "Questions about New Leave Policy," "Ideas for Team Building").
    - **Forum Category:** Dropdown (e.g., "General HR," "Policies," "Benefits," "Suggestions").
    - **Initial Post Content:** Rich text editor for the opening message.
    - **Attachments (Optional):** File upload.
    - **Visibility:** Dropdown (e.g., "All Users," "Specific Departments/Groups").
- **Reply/Comment Form (within a topic):**
    - **Comment Content:** Text area.
    - **Attachment (Optional):** File upload.

5. Feedback Collection

This collects and analyzes employee feedback.

- **Feedback Submission Form (filled by employee/user):**
    - **Feedback Type:** Dropdown (e.g., "Suggestion," "Complaint," "General Feedback," "Praise").
    - **Related Topic/Department:** Dropdown (e.g., "HR Policies," "Management," "Work Environment," "Specific Person").
    - **Subject:** Text input.
    - **Feedback Details:** Rich text editor for the main content of the feedback.
    - **Anonymity Option:** Checkbox (e.g., "Submit Anonymously").
    - **Attachment (Optional):** File upload.
- **Feedback Management Form (Internal/Admin):**
    - **Status:** Dropdown (e.g., "New," "Under Review," "Actioned," "Closed").
    - **Assigned To:** Dropdown to assign to an HR team member.
    - **Action Taken:** Text area for documenting steps taken.

6. Survey Management

This creates and distributes employee surveys.

- **Survey Creation Form (Internal/Admin):**
    - **Survey Title:** Text input (e.g., "Annual Employee Engagement Survey," "Post-Training Feedback").
    - **Survey Description:** Text area explaining the survey's purpose.
    - **Survey Questions:** (Multiple input fields for different question types):
        - **Question Type:** Dropdown
        - **Question Text:** Text input.
        - **Options (for MC/Rating):** Input fields for each choice.
        - **Required Question:** Checkbox.
    - **Target Audience:** Selector (e.g., "All," "Department," "Role").
    - **Start Date:** Date picker.
    - **End Date:** Date picker.
    - **Anonymity Settings:** Checkbox (e.g., "Responses are anonymous").
    - **Reminders:** Schedule automatic reminder notifications.
- **Survey Distribution Settings:**
    - **Distribution Method:** Dropdown (e.g., "Email Link," "In-app Pop-up").

7. Announcement Board

This manages company-wide announcements and updates.

- **Announcement Creation Form:**
    - **Announcement Title:** Text input (e.g., "Company Holiday Schedule," "New HR System Launch").
    - **Announcement Content:** Rich text editor for the full details.
    - **Publish Date:** Date picker.
    - **Expiration Date (Optional):** Date picker for when the announcement should be removed.
    - **Visibility:** Dropdown (e.g., "All Users," "Specific Departments").
    - **Pin to Top:** Checkbox to keep the announcement at the top of the board.
    - **Attachment(s):** File upload.

8. Integration Hub

This integrates with external communication tools. This feature is about **configuration settings** for connections, not direct user input forms for daily use.

- **Integration Setup Form (Internal/Admin):**
    - **External Tool Name:** Dropdown (e.g., "Slack," "Microsoft Teams," "Zoom," "Google Meet").
    - **API Key/Credentials:** Secure input field for authentication.
    - **Integration Scope:** What data/functionality will be shared (e.g., "Send notifications to Slack channel," "Embed Zoom meeting links").
    - **Webhook URLs:** Input field for callback URLs.
    - **Status:** Toggle (e.g., "Enabled," "Disabled").
    - **Error Logging:** Configuration for how to log integration errors.

Payroll & Compensation Management

1. Payroll Processing

This involves automated calculation and processing of salaries. While much of this is automated, initial setup and manual adjustments require input.

- **Employee/Mentor Payroll Setup Form (Internal/HR):**
    - **Employee/Mentor ID:** Unique identifier (linked from HR Profile/Mentor Database).
    - **Pay Frequency:** Dropdown (e.g., "Monthly," "Bi-Weekly," "Weekly").
    - **Bank Account Details:** Bank Name, Account Number, IFSC Code (for direct deposit – **highly sensitive data, requires strong security**).
    - **PAN/Tax ID:** For tax compliance.
    - **Joining Date:** To determine prorated salary if applicable.
    - **Basic Pay Component:** Numerical input.
    - **Other Fixed Allowances:** (e.g., HRA, Conveyance, Medical – Numerical inputs).
    - **Fixed Deductions:** (e.g., PF, ESI, Loan Repayments – Numerical inputs).
    - **Payroll Group/Category:** Dropdown (e.g., "Salaried," "Hourly," "Intern").
- **Variable Earnings/Deductions Input (Internal/HR, per payroll cycle):**
    - **Employee/Mentor ID:**
    - **Earning Type:** Dropdown (e.g., "Overtime Hours," "Performance Bonus," "Reimbursement").
    - **Amount/Hours:** Numerical input.

- **Deduction Type:** Dropdown (e.g., "Leave Without Pay (LWP) Days," "Advance Recovery," "Fine").
- **Amount/Days:** Numerical input.
- **Reason/Description:** Text area.

---

2. Compensation Structure

This manages salary structures and pay scales.

- **Compensation Structure Definition Form (Internal/HR Admin):**
  - **Structure Name:** (e.g., "Managerial Grade A," "Technical Analyst Scale," "Intern Stipend").
  - **Job Grade/Level:** Dropdown/Text input.
  - **Components Definition:**
    - **Component Name:** (e.g., "Basic Salary," "House Rent Allowance (HRA)," "Provident Fund (PF)").
    - **Calculation Method:** Dropdown (e.g., "Fixed Amount," "Percentage of Basic," "Formula-based").
    - **Value/Percentage:** Numerical input.
    - **Taxable:** Checkbox (Yes/No).
    - **Applicability:** (e.g., "All employees," "Specific roles").
  - **Effective Date:** Date picker for when this structure becomes active.
- **Employee/Mentor Assignment to Structure (Internal/HR):**
  - **Employee/Mentor ID:** Select individual.
  - **Assigned Structure:** Dropdown to link to a defined compensation structure.

3. Bonus & Incentive Management

This calculates and distributes bonuses and incentives.

- **Bonus/Incentive Program Setup Form (Internal/HR Admin):**
  - **Program Name:** (e.g., "Annual Performance Bonus," "Sales Commission Plan," "Project Completion Incentive").
  - **Program Type:** Dropdown (e.g., "Performance-based," "Referral Bonus," "Retention Bonus").
  - **Eligibility Criteria:** Text area/Rules builder (e.g., "All employees with 1+ year service," "Sales team achieving 120% target").
  - **Calculation Logic:** Text area/Formula builder (e.g., "10% of annual basic salary," "INR 5000 per successful referral").

    - **Payout Frequency:** Dropdown (e.g., "Annually," "Quarterly," "One-time").
    - **Effective Date:**
- **Bonus/Incentive Payout Input (Internal/HR, at payout time):**
    - **Employee/Mentor ID:** Select individual(s).
    - **Program Name:** Select the relevant program.
    - **Payout Amount:** Numerical input (can be auto-calculated).
    - **Payout Date:**
    - **Notes:**

4. Tax Management

This handles tax calculations and statutory compliance.

- **Tax Component Configuration (Internal/HR Admin):**
    - **Tax Type:** (e.g., "Income Tax (TDS)," "Professional Tax (PT)," "Provident Fund (PF)," "Employee State Insurance (ESI)").
    - **Applicable Rules/Slabs:** Text area/Rules builder for tax calculation logic (e.g., "Income Tax Slabs," "PF percentage").
    - **Deduction Frequency:** (e.g., "Monthly," "Annually").
    - **Reporting Forms:** Link to relevant government forms (e.g., "Form 16").
- **Employee/Mentor Tax Declaration (Employee Self-Service):**
    - **Investment Declaration:** Input fields for investments under various sections (e.g., "80C," "80D").
    - **House Rent Details:** Landlord's name, PAN, rent amount.
    - **Previous Employment Income (for new joiners):**
- **Statutory Contribution Input (Internal/HR):**
    - **Monthly PF/ESI Contributions:** (Calculated, but manual override may be needed).

5. Payslip Generation

This automates payslip creation and distribution. The inputs are primarily for **designing the payslip template** and **triggering generation**.

- **Payslip Template Design (Internal/HR Admin):**
    - **Company Logo Upload:**
    - **Fields to Display:** Checkboxes to select which earnings, deductions, and statutory components appear on the payslip.
    - **Layout Customization:** (Drag-and-drop interface or similar).
    - **Company Information:** Address, GSTIN, etc.

- **Payslip Generation Trigger (Internal/Automated):**
    - **Payroll Period:** Select month/year.
    - **Generate for:** Dropdown (e.g., "All Employees," "Specific Employee/Mentor").
    - **Distribution Method:** Dropdown (e.g., "Email," "Employee Portal Download").

6. Expense Management

This tracks and reimburses employee/mentor expenses.

- **Expense Submission Form (filled by Employee/Mentor):**
    - **Expense Date:** Date picker.
    - **Expense Category:** Dropdown (e.g., "Travel," "Meals," "Accommodation," "Training," "Miscellaneous").
    - **Amount:** Numerical input.
    - **Currency:** Dropdown.
    - **Description:** Text area explaining the expense.
    - **Receipt Upload:** File upload for scanned receipts/invoices.
    - **Project/Department (Optional):** Link expense to a specific project or department for cost tracking.
- **Expense Approval Form (filled by Manager/Approver):**
    - **Approval Status:** Dropdown (e.g., "Pending," "Approved," "Rejected," "Returned for Revision").
    - **Approver Comments:** Text area.
    - **Reimbursement Amount:** Numerical input (if adjusted).
    - **Reimbursement Date:** Date picker.

7. Compensation Analytics

This analyzes compensation trends and market rates. This is a **reporting and visualization feature**, so input fields are primarily for **filtering and generating reports**.

- **Analytics Dashboard Filters:**
    - **Time Period:** Date range.
    - **Department/Role Filter:**
    - **Experience Level Filter:**
    - **Compensation Component Filter:** (e.g., "Basic Salary," "Total CTC").
    - **Metrics Selection:** Checkboxes for metrics to display (e.g., "Average Salary by Role," "Compensation Trends over Time," "Gender Pay Gap Analysis," "Market Rate Comparison").

- **External Data Upload (for market rates):** Option to upload external salary benchmark data (e.g., CSV file).
- **Export Options:** Button to download data.

8. Financial Reporting

This generates financial reports for HR expenses. This is primarily a **reporting feature**.

- **Report Generation Inputs:**
  - **Report Type:** Dropdown (e.g., "Payroll Expense Summary," "Departmental Expense Report," "Bonus Payout Summary").
  - **Reporting Period:** Start and End Dates.
  - **Filters:** By department, expense category, employee type.
  - **Aggregation Level:** (e.g., "Monthly," "Quarterly," "Annually").
  - **Export Format:** (e.g., "PDF," "Excel," "CSV").
  - **Cost Center/GL Code Mapping:** Configuration settings to link HR expenses to specific accounting codes (Internal/Admin).

Learning & Development Management

1. Training Program Management

This involves creating and managing various training programs.

- **Training Program Creation Form:**
  - **Program Name:** Text input
  - **Description:** Rich text editor
  - **Target Audience:** Multi-select dropdown or Checkboxes
  - **Start Date:** Date picker.
  - **End Date:** Date picker.
  - **Trainer/Instructor:** Text input or Dropdown/Search
  - **Training Materials:** File upload (for presentations, handouts) or Link input (for external resources like YouTube videos, online articles).
  - **Enrollment Capacity:** Numerical input (Maximum number of participants allowed).
  - **Enrollment Deadline:** Date picker.
  - **Cost per Participant (Optional):** Numerical input (for budgeting if applicable).
  - **Status:** Dropdown (e.g., "Planned", "Active", "Completed", "Cancelled").
  - **Certification Offered:** Checkbox (if completion leads to a certificate).

2. Skill Development Tracking

This monitors the progress of individual and team skill development.

- **Skill Assessment/Update Form (filled by Employee/Student/Mentor, or Manager):**
    - **Individual Name:** Dropdown/Search (to select the person whose skills are being tracked).
    - **Skill Name:** Text input or Dropdown (to select from a predefined skill
    - **Skill Category:** Dropdown
    - **Current Proficiency Level:** Rating scale (e.g., 1-5) or Dropdown
    - **Target Proficiency Level:** Rating scale or Dropdown (what level they aim to achieve).
    - **Development Activity:** Text area
    - **Start Date of Development:** Date picker.
    - **Completion Date (of activity):** Date picker.
    - **Status:** Dropdown.
    - **Evidence/Certificate:** File upload (for proof of completion).
    - **Manager/Mentor Remarks:** Text area (for feedback on skill progress).

3. Learning Path Creation

This designs personalized learning paths for individuals or roles.

- **Learning Path Design Form (Internal/Admin):**
    - **Learning Path Name:** Text input (e.g., "New Software Engineer Onboarding Path", "Future Leader Development Path").
    - **Description:** Text area (Overview of the path's purpose).
    - **Target Roles/Levels:** Multi-select dropdown (e.g., "Entry-Level Developers", "Team Leads").
    - **Required Modules/Courses:** Multi-select dropdown (to link existing training programs or external courses).
    - **Recommended Resources:** Text area or Link input fields (for articles, books, videos not formal courses).
    - **Estimated Completion Time:** Numerical input + Dropdown (e.g., "3" months, "6" weeks).
    - **Owner/Curator:** Dropdown/Search (who manages this learning path).
    - **Status:** Dropdown (e.g., "Draft", "Published", "Archived").

- **Individual Assignment to Learning Path:**
    - **Individual Name:** Dropdown/Search.
    - **Assigned Learning Path:** Dropdown.
    - **Assignment Date:** Date picker.
    - **Progress:** Numerical input or Percentage slider (often auto-calculated).

4. Training Effectiveness

This measures the ROI (Return on Investment) and overall effectiveness of training.

- *Primarily an **analytical/reporting feature**; relies on data collected from other modules.*
- **Input Fields for Measurement & Feedback:**
    - **Post-Training Survey/Feedback Form:**
        - **Training Program Name:** (Pre-filled).
        - **Participant Name:** (Pre-filled).
        - **Relevance to Job Role:** Rating scale (e.g., 1-5).
        - **Quality of Instructor:** Rating scale.
        - **Clarity of Materials:** Rating scale.
        - **Overall Satisfaction:** Rating scale.
        - **Most Useful Aspect:** Text area.
        - **Suggestions for Improvement:** Text area.
        - **Applicability to Work:** Yes/No or Text area (How they will apply new skills).
    - **Performance Impact Assessment (filled by Manager post-training):**
        - **Employee Name:** Dropdown/Search.
        - **Training Program Name:** Dropdown.
        - **Observed Skill Improvement:** Rating scale or Text area.
        - **Impact on Productivity/Performance:** Text area (Specific examples).
        - **Manager's Recommendation:** Text area.
    - **Cost Input (Internal/Admin):** Numerical input (Total cost of the training program, including materials, instructor fees, venue).
    - **ROI Metrics Configuration (Internal/Admin):** Define how ROI is calculated (e.g., based on performance increase, reduction in errors).

5. External Training Coordination

This manages participation in external training and certifications.

- **External Training Request/Approval Form (filled by Employee/Student/Mentor):**

    - **Applicant Name:** (Pre-filled).
    - **External Course/Certification Name:** Text input (e.g., "Certified Scrum Master", "Google Analytics Certification").
    - **Provider:** Text input (e.g., "Scrum.org", "Google Skillshop", "Udemy").
    - **Course URL/Link:** URL input.
    - **Reason for Training:** Text area (How it benefits their role/career).
    - **Start Date:** Date picker.
    - **End Date:** Date picker.
    - **Estimated Cost:** Numerical input.
    - **Reimbursement Request:** Checkbox + File upload (for invoice/receipt).
    - **Manager Approval Status:** Dropdown (Internal).
    - **HR Approval Status:** Dropdown (Internal).
- **External Training Completion Tracking (Internal/Admin or Self-Service):**
    - **Individual Name:** Dropdown/Search.
    - **Course/Certification Name:** Dropdown (select from previously requested/approved list).
    - **Completion Date:** Date picker.
    - **Status:** Dropdown (e.g., "Completed", "Pending Certification", "Failed").
    - **Certificate/Proof of Completion:** File upload.

6. Mentorship Programs

This facilitates and tracks mentorship and coaching relationships.

- *This feature would heavily integrate with the **Advanced Mentor Allocation System** and **Mentor Management System**.*
- **Mentorship Program Setup Form (Internal/Admin):**
    - **Program Name:** Text input (e.g., "New Hire Mentorship Program", "Leadership Coaching Initiative").
    - **Program Goals:** Text area (What the program aims to achieve, e.g., "Accelerate new hire ramp-up", "Develop future leaders").
    - **Eligibility Criteria (for Mentees):** Text area (e.g., "All employees in their first 6 months", "High-potential employees").
    - **Program Duration:** Numerical input + Dropdown (e.g., "3" months, "6" weeks).
    - **Recommended Check-in Frequency:** Text input (e.g., "Bi-weekly", "Monthly").
    - **Program Manager:** Dropdown/Search (who oversees the program).

- **Mentee Enrollment Form:**
    - **Mentee Name:** Dropdown/Search.
    - **Desired Areas of Growth:** Multi-select dropdown or Text area.
    - **Preferred Mentor Attributes:** Text area (e.g., "Someone from a different department", "Experience in marketing").
- **Mentorship Session Logging (Optional, by Mentor/Mentee):**
    - **Session Date:** Date picker.
    - **Duration:** Numerical input (in hours/minutes).
    - **Topics Discussed:** Text area.
    - **Action Items:** Text area.
    - **Next Session Date:** Date picker.

7. Knowledge Management

This creates and maintains an organizational knowledge base.

- **Knowledge Base Article/Document Creation Form:**
    - **Title:** Text input (e.g., "How to Request Leave", "New Employee Benefits Guide").
    - **Category/Topic:** Dropdown or Text input (e.g., "HR Policies", "IT Support", "Onboarding").
    - **Content:** Rich text editor (The actual content of the article, including text, images, and embedded videos).
    - **Author:** Text input or Dropdown/Search.
    - **Publish Date:** Date picker.
    - **Last Updated:** Date picker (often auto-populated).
    - **Version Number:** Numerical input (for tracking changes).
    - **Attachment(s):** File upload (for supporting documents like PDFs).
    - **Keywords/Tags:** Text input (comma-separated for searchability).
    - **Visibility:** Dropdown (e.g., "All Employees", "HR Team Only", "Specific Department").
    - **Review Date:** Date picker (when the article should be reviewed for accuracy).

8. Career Development Planning

This supports individual career development plans.

- **Career Development Plan Form (filled by Employee/Student, with Manager input):**
    - **Individual Name:** Dropdown/Search.
    - **Current Role:** (Pre-filled).

- **Desired Future Role(s):** Text input or Dropdown (if linked to job roles in the system).
- **Short-term Career Goals (1-2 years):** Text area.
- **Long-term Career Goals (3-5 years):** Text area.
- **Skills to Develop:** Multi-select dropdown or Text area (linked to skill library or manually entered).
- **Learning Activities Planned:** Text area (e.g., "Complete X certification", "Shadow Y role", "Take Z online course").
- **Timeline for Activities:** Date picker for specific milestones.
- **Support Needed from Company:** Text area (e.g., "Funding for course", "Mentorship opportunity", "Access to specific projects").
- **Manager/Mentor Discussion Notes:** Text area (for feedback and agreements).
- **Status:** Dropdown (e.g., "Draft", "Approved", "In Progress", "Completed", "Archived").
- **Next Review Date:** Date picker.

Analytics & Reporting Dashboard

1. HR Metrics Dashboard

- **Input Fields for Filtering/Viewing:**
    - **Time Period:** Date range picker (e.g., "Last Month," "Current Quarter," "Custom Dates").
    - **Department Filter:** Multi-select dropdown (to view metrics for specific departments).
    - **Employee/Student Type Filter:** Dropdown (e.g., "All," "Mentors," "Students," "HR Staff").
    - **Specific Metric Selection:** Checkboxes or Multi-select dropdown (to choose which KPIs to display on the dashboard, e.g., "Active Students," "Average Leave Days," "Recruitment Cost per Hire").

2. Custom Report Builder

This allows users to create customized reports using a drag-and-drop interface.

- **Report Configuration Inputs:**
    - **Report Name:** Text input
    - **Data Source Selection:** Dropdown
    - **Fields to Include:** Multi-select dropdown

- **Filters:** Add Filter button, followed by:
  - **Field Name:** Dropdown
  - **Operator:** Dropdown
  - **Value:** Dropdown (depending on the field type).
- **Group By:** Dropdown
- **Sort By:** Dropdown (to define the sorting order).
- **Aggregation Functions (Optional):** Checkboxes or Dropdowns
- **Chart Type (Optional for visualization):** Dropdown
- **Save Report Template:** Button to save the configured report for future use.

3. Predictive Analytics

This provides AI-powered predictions for various HR aspects like turnover, performance, and hiring needs.

Prediction Model Configuration (Internal/Admin):

- **Prediction Type:** Dropdown
- **Data Inputs for Model:** Checkboxes
- **Prediction Frequency:** Dropdown
- **Confidence Threshold:** Numerical input (e.g., show predictions with >70% confidence).
- **Key Factors Display:** Checkboxes (to show which factors contribute most to the prediction).

- **Prediction Display Filters:**
  - **Prediction Date:** Date picker.
  - **Department/Group:** Dropdown.
  - **Risk Level (for turnover):** Dropdown (e.g., "High," "Medium," "Low").
  - **Actionable Insights Input (Internal):** Text area (for HR/managers to log actions taken based on predictions).

4. Trend Analysis 📈

This conducts long-term trend analysis for strategic planning.

Trend Report Configuration Inputs:

- **Metric to Analyze:** Dropdown (e.g., "Absenteeism Rate," "Average Time to Hire," "Skill Proficiency Levels," "Training Completion Rate").
- **Time Period:** Date range picker (long-term, e.g., "Last 3 Years," "Year-over-Year").
- **Granularity:** Dropdown (e.g., "Monthly," "Quarterly," "Annually").

    - **Breakdown By:** Dropdown (e.g., "Department," "Job Role," "Gender").
    - **Comparison Period:** Checkbox (e.g., "Compare to Previous Year").
    - **Chart Type:** Dropdown (e.g., "Line Chart," "Area Chart").

5. Benchmarking

This compares HR metrics against industry standards.

- **Benchmarking Configuration Inputs (Internal/Admin):**
    - **Metric for Benchmarking:** Dropdown (e.g., "Employee Turnover Rate," "Cost per Hire," "Training Spend per Employee").
    - **Industry Data Upload:** File upload (for CSV or Excel containing industry benchmark data).
    - **Industry Sector:** Dropdown (e.g., "IT Services," "Education," "Manufacturing").
    - **Company Size Range:** Dropdown (e.g., "100-500 Employees," "500-1000 Employees").
    - **Comparison Period:** Date range picker.
- **Benchmarking Report View Filters:**
    - **Metric:** Dropdown.
    - **Your Company Data:** (Auto-displayed).
    - **Industry Average:** (Displayed from uploaded data).
    - **Variance:** (Calculated field).

6. Executive Reporting

This generates high-level executive dashboards and summaries.

- **Executive Report Generation Inputs:**
    - **Report Template:** Dropdown (e.g., "Monthly HR Summary," "Quarterly Business Review - HR Section").
    - **Reporting Period:** Date range picker.
    - **Key Highlights/Narrative:** Text area (for manual input of executive summary comments).
    - **Sections to Include:** Checkboxes (e.g., "Recruitment Summary," "Performance Overview," "Talent Development Update").
    - **Recipient List (for distribution):** Multi-select dropdown/Search.

7. Automated Reporting

This schedules automated report generation and delivery.

- **Automated Report Schedule Form:**
    - **Report Name (from Custom Report Builder or predefined):** Dropdown.
    - **Recipients:** Multi-select dropdown (email addresses).
    - **Frequency:** Dropdown (e.g., "Daily," "Weekly," "Monthly," "Quarterly").
    - **Day/Date of Week/Month:** Date picker or Dropdown (e.g., "Every Monday," "1st of every month").
    - **Time of Day:** Time picker.
    - **Delivery Format:** Dropdown (e.g., "PDF," "Excel," "CSV").
    - **Subject Line for Email:** Text input.
    - **Email Body for Report Delivery:** Text area.
    - **Status:** Toggle (Enable/Disable).

8. Data Export

This allows exporting reports in multiple formats (PDF, Excel, CSV).

- *This is an action triggered from various report viewing screens.*
- **Export Options (Contextual Buttons):**
    - Export to PDF button.
    - Export to Excel button.
    - Export to CSV button.
- **Export Settings (Optional pop-up):**
    - **Fields to Include:** Checkboxes (for raw data exports, might be pre-selected based on current view).
    - **Delimiter (for CSV):** Dropdown (e.g., "Comma," "Tab").

9. Real-time Dashboards

- **Configuration Inputs (Internal/Admin):**
    - **Refresh Rate:** Numerical input + Dropdown (e.g., "5" minutes, "1" hour).
    - **Metrics to Display:** Checkboxes (select high-priority KPIs for real-time view).
    - **Alert Thresholds:** Numerical input (e.g., "Alert if attendance drops below 90%").
    - **Notification Recipients (for alerts):** Multi-select dropdown.
- **Display Filters (similar to HR Metrics Dashboard):**
    - **Time Period:** Quick selectors (e.g., "Today," "Current Week").

Employee Relations & Grievance Management

When designing a form, consider what specific data points are needed to effectively manage each process.

1. Grievance Management

- **Purpose:** To handle employee complaints and grievance resolution.
- **Input Fields:**
    - **Grievance ID:** (Auto-generated or text input) A unique identifier for tracking.
    - **Date Reported:** (Date picker) When the grievance was officially submitted.
    - **Reporter's Name (Optional/Anonymous):** (Text input) If the grievance isn't anonymous.
    - **Employee(s) Involved:** (Text input or multi-select dropdown if linked to an employee database) Names of those directly involved.
    - **Nature of Grievance:** (Multi-line text area) Detailed description of the complaint.
    - **Category:** (Dropdown: Harassment, Discrimination, Workplace Conflict, Unfair Treatment, Safety Concern, Wage Dispute, etc.) Helps categorize the type of issue.
    - **Desired Resolution:** (Multi-line text area) What the reporting party hopes to achieve.
    - **Assigned Investigator:** (Dropdown or text input) Who is handling the case.
    - **Investigation Start Date:** (Date picker)
    - **Investigation End Date (Expected/Actual):** (Date picker)
    - **Status:** (Dropdown: Open, Under Investigation, Resolved, Escalated, Closed)
    - **Resolution Details:** (Multi-line text area) How the grievance was resolved.
    - **Date Closed:** (Date picker)

2. Disciplinary Actions

- **Purpose:** To manage disciplinary processes and documentation.
- **Input Fields:**
    - **Employee Name:** (Text input or dropdown) The employee receiving the disciplinary action.
    - **Date of Incident:** (Date picker) When the infraction occurred.
    - **Date of Disciplinary Action:** (Date picker) When the action was issued.
    - **Type of Infraction:** (Dropdown: Absenteeism, Tardiness, Policy Violation, Misconduct, Performance Issue, etc.)
    - **Description of Incident/Violation:** (Multi-line text area) Specific details of what happened.

    - **Previous Disciplinary Actions (if any):** (Dropdown or link to employee's record) To see if this is a recurring issue.
    - **Level of Disciplinary Action:** (Dropdown: Verbal Warning, Written Warning, Final Warning, Suspension, Termination)
    - **Corrective Actions Required:** (Multi-line text area) What the employee needs to do to improve.
    - **Improvement Plan Start Date:** (Date picker)
    - **Follow-up Date:** (Date picker)
    - **Manager/HR Representative:** (Text input or dropdown) Who issued the action.
    - **Employee Acknowledgment (Yes/No):** (Checkbox) Did the employee acknowledge receipt?
    - **Documentation Link:** (URL input or file upload) Link to official document.

3. Mediation Support

- **Purpose:** To facilitate conflict resolution and mediation.
- **Input Fields:**
    - **Mediation Request Date:** (Date picker)
    - **Parties Involved:** (Multi-line text area) Names of individuals or teams involved in the conflict.
    - **Nature of Conflict:** (Multi-line text area) Brief description of the disagreement.
    - **Mediator Assigned:** (Dropdown or text input) Who is facilitating.
    - **Mediation Start Date:** (Date picker)
    - **Mediation Session Dates:** (Multi-date picker)
    - **Outcome/Agreements:** (Multi-line text area) The resolution reached.
    - **Status:** (Dropdown: Scheduled, In Progress, Resolved, Unresolved)
    - **Follow-up Required (Yes/No):** (Checkbox)
    - **Follow-up Date:** (Date picker)

4. Employee Counseling

- **Purpose:** To track counseling sessions and support programs.
- **Input Fields:**
    - **Employee ID (Optional/Confidential):** (Text input) Can be anonymized for privacy.
    - **Date of Session:** (Date picker)
    - **Counselor/Support Provider:** (Text input or dropdown)

    - **Reason for Counseling:** (Dropdown: Stress, Work-Life Balance, Conflict, Performance Anxiety, Personal Issue, etc.)
    - **Session Type:** (Dropdown: Individual, Group, Remote)
    - **Key Discussion Points (Brief/Confidential):** (Multi-line text area) High-level, non-identifying summary.
    - **Recommendations/Next Steps:** (Multi-line text area)
    - **Follow-up Date (if applicable):** (Date picker)

5. Exit Interviews

- **Purpose:** To conduct and analyze exit interviews.
- **Input Fields:**
    - **Employee Name:** (Text input) The departing employee.
    - **Employee ID:** (Text input)
    - **Last Day of Employment:** (Date picker)
    - **Interview Date:** (Date picker)
    - **Interviewer:** (Text input or dropdown)
    - **Reason for Leaving (from employee):** (Multi-line text area or dropdown: Better Opportunity, Relocation, Dissatisfaction with Management, Compensation, etc.)
    - **Feedback on Company Culture:** (Multi-line text area)
    - **Feedback on Management:** (Multi-line text area)
    - **Feedback on Job Role/Responsibilities:** (Multi-line text area)
    - **Suggestions for Improvement:** (Multi-line text area)
    - **Overall Satisfaction with Company:** (Rating scale: 1-5 or 1-10)
    - **Key Takeaways/Actionable Insights:** (Multi-line text area)

6. Employee Satisfaction

- **Purpose:** To monitor employee satisfaction and engagement levels.
- **Input Fields:**
    - **Survey/Initiative Name:** (Text input) e.g., "Annual Employee Satisfaction Survey 2025"
    - **Date Conducted:** (Date picker or date range)
    - **Platform Used:** (Text input or dropdown)
    - **Participation Rate:** (Number input with % sign)
    - **Overall Satisfaction Score:** (Number input or rating)

    - **Key Strengths Identified:** (Multi-line text area)
    - **Areas for Improvement Identified:** (Multi-line text area)
    - **Action Plan Status:** (Dropdown: Not Started, In Progress, Completed)
    - **Responsible Team for Action Plan:** (Text input or dropdown)
    - **Next Survey Date (Expected):** (Date picker)

7. Whistleblower Support

- **Purpose:** To provide a secure reporting system for sensitive issues.
- **Input Fields:**
    - **Report ID:** (Auto-generated) For anonymous tracking.
    - **Date Reported:** (Date picker)
    - **Report Type:** (Dropdown: Ethics Violation, Fraud, Harassment, Safety Concern, etc.)
    - **Description of Issue:** (Multi-line text area) Details of the reported concern (ensuring anonymity if chosen).
    - **Anonymity Status:** (Dropdown: Anonymous, Identified)
    - **Severity Level:** (Dropdown: Low, Medium, High, Critical)
    - **Assigned Investigator:** (Dropdown or text input)
    - **Investigation Start Date:** (Date picker)
    - **Status:** (Dropdown: Open, Under Review, Under Investigation, Resolved, Closed)
    - **Resolution Summary:** (Multi-line text area) Outcome of the investigation.
    - **Date Closed:** (Date picker)

8. Legal Compliance

- **Purpose:** To ensure compliance with employment laws and regulations.
- **Input Fields:**
    - **Compliance Area:** (Text input or dropdown: Wage & Hour, OSHA, ADA, EEO, GDPR, etc.)
    - **Relevant Law/Regulation:** (Text input) e.g., "Minimum Wage Act"
    - **Effective Date:** (Date picker)
    - **Compliance Status:** (Dropdown: Compliant, Partially Compliant, Non-Compliant, Under Review)
    - **Risk Level (if non-compliant):** (Dropdown: Low, Medium, High)
    - **Actions Required for Compliance:** (Multi-line text area)
    - **Responsible Department/Team:** (Text input or dropdown)

    - **Due Date for Actions:** (Date picker)
    - **Review Date:** (Date picker) For periodic checks.
    - **Documentation Link:** (URL input or file upload) Link to policies, audits, etc

Change Management & Organizational Development

1. Change Initiative Tracking

- **Purpose:** To monitor organizational change programs.
- **Input Fields:**
    - **Change Initiative Name:** (Text input) e.g., "Digital Transformation Project"
    - **Description:** (Multi-line text area) e.g., "Implementing new CRM system across all departments."
    - **Start Date:** (Date picker)
    - **End Date (Expected):** (Date picker)
    - **Current Status:** (Dropdown: Not Started, In Progress, On Hold, Completed, Canceled)
    - **Lead Department/Team:** (Text input or dropdown if predefined)
    - **Key Stakeholders:** (Multi-line text area or multi-select dropdown for specific roles)
    - **Budget Allocated:** (Number input, Currency type)
    - **Progress Notes:** (Multi-line text area, perhaps with date/time stamp for each entry)

2. Team Restructuring

- **Purpose:** To manage team reorganizations and role changes.
- **Input Fields:**
    - **Restructuring Project Name:** (Text input) e.g., "Sales Department Reorganization"
    - **Affected Department(s):** (Multi-select dropdown or text input)
    - **Reason for Restructuring:** (Multi-line text area) e.g., "To improve efficiency and reduce redundancies."
    - **Restructuring Type:** (Dropdown: Merger, Split, Downsizing, Upsizing, Role Redefinition)
    - **Effective Date:** (Date picker)
    - **New Reporting Structure (Description/Link to Chart):** (Multi-line text area or URL input)
    - **Impacted Employees (Number):** (Number input)
    - **Communication Plan Status:** (Dropdown: Not Started, Drafted, Approved, Executed)

3. Culture Development

- **Purpose:** To track and promote organizational culture initiatives.
- **Input Fields:**
    - **Culture Initiative Name:** (Text input) e.g., "Values Reinforcement Program"
    - **Core Value(s) Targeted:** (Multi-select dropdown or text input) e.g., "Innovation, Collaboration"
    - **Program Start Date:** (Date picker)
    - **Program End Date (Expected):** (Date picker)
    - **Activities/Events Planned:** (Multi-line text area) e.g., "Workshops, team-building exercises, recognition programs."
    - **Measurement Metrics:** (Text input) e.g., "Employee survey scores, participation rates."
    - **Budget for Initiative:** (Number input, Currency type)

4. Employee Engagement

- **Purpose:** To measure and improve employee engagement.
- **Input Fields:**
    - **Engagement Initiative Name:** (Text input) e.g., "Annual Engagement Survey"
    - **Survey Date(s):** (Date picker or date range picker)
    - **Platform Used:** (Text input or dropdown) e.g., "Qualtrics, internal survey tool"
    - **Key Engagement Drivers Measured:** (Multi-line text area) e.g., "Work-life balance, career development, recognition."
    - **Action Plan Status:** (Dropdown: Not Started, In Progress, Completed)
    - **Responsible Team:** (Text input or dropdown)
    - **Follow-up Date (Expected):** (Date picker)

5. Leadership Development

- **Purpose:** To identify and develop leadership potential.
- **Input Fields:**
    - **Program Name:** (Text input) e.g., "Emerging Leaders Program"
    - **Target Audience:** (Text input or dropdown) e.g., "Mid-level managers, High-potential employees"
    - **Start Date:** (Date picker)
    - **End Date:** (Date picker)
    - **Modules/Topics Covered:** (Multi-line text area or checklist)

    - **Participants (Number):** (Number input)
    - **Trainer/Facilitator:** (Text input)
    - **Feedback Mechanism:** (Text input) e*g*., "Post-program surveys, 360-degree feedback."

6. Organizational Charts

- **Purpose:** To visualize dynamic organizational structure.
- **Input Fields:**
    - **Chart Version Name/Date:** (Text input/Date picker) e.g., "Q3 2025 Org Chart"
    - **Last Updated By:** (Text input)
    - **Link to Chart Visualization Tool/File:** (URL input or file upload)
    - **Key Changes Since Last Version:** (Multi-line text area)
    - **Approval Status:** (Dropdown: Draft, Under Review, Approved)

7. Change Communication

- **Purpose:** To communicate changes effectively across the organization.
- **Input Fields:**
    - **Communication Plan Name:** (Text input) e.g., "CRM System Rollout Communication"
    - **Related Change Initiative:** (Dropdown, linking to "Change Initiative Tracking" records)
    - **Target Audience(s):** (Multi-select dropdown or text input)
    - **Key Message(s):** (Multi-line text area)
    - **Communication Channels:** (Checklist: Email, Intranet, Town Hall, Team Meetings, Posters)
    - **Scheduled Dates for Communication:** (Date picker or recurring date selector)
    - **Sent By:** (Text input or dropdown)
    - **Feedback Mechanism for Communication:** (Text input)

8. Impact Assessment

- **Purpose:** To assess the impact of organizational changes.
- **Input Fields:**
    - **Assessment Name:** (Text input) e.g., "Post-CRM Implementation Impact"
    - **Related Change Initiative:** (Dropdown, linking to "Change Initiative Tracking" records)
    - **Assessment Date:** (Date picker)

- **Areas of Impact Assessed:** (Multi-select dropdown or text input) e.g., "Productivity, Employee Morale, Customer Satisfaction"
- **Methodology Used:** (Text input) e.g., "Surveys, interviews, data analysis."
- **Key Findings:** (Multi-line text area)
- **Recommendations:** (Multi-line text area)
- **Action Plan for Mitigating Negative Impacts:** (Multi-line text area)

Integration & API Management

1. HRIS Integration

- **Purpose:** To connect with existing HR information systems.
- **Input Fields:**
    - **HRIS System Name:** (Text input or dropdown) E.g., "Workday," "SAP SuccessFactors," "Custom HRIS."
    - **Integration Type:** (Dropdown) E.g., "Data Sync (Employee Records)," "Time Off Management," "Onboarding."
    - **Integration Status:** (Dropdown) E.g., "Planned," "In Progress," "Active," "Paused," "Retired."
    - **Authentication Method:** (Dropdown) E.g., "OAuth 2.0," "API Key," "Username/Password," "SAML."
    - **API Endpoint URL:** (Text input) The specific address for the integration.
    - **Key Data Synced:** (Multi-line text area or checklist) E.g., "Employee ID, Name, Department, Job Title."
    - **Integration Owner/POC:** (Text input or dropdown) Who is responsible for managing this integration.
    - **Last Successful Sync Date:** (Date picker) To track recent activity.
    - **Notes:** (Multi-line text area) Any additional relevant information.

2. Payroll System Integration

- **Purpose:** To integrate with external payroll providers.
- **Input Fields:**
    - **Payroll Provider Name:** (Text input or dropdown) E.g., "ADP," "Paychex," "Gusto."
    - **Integration Type:** (Dropdown) E.g., "Time Tracking Data," "Employee Deductions," "New Hires/Terminations."
    - **Integration Status:** (Dropdown) E.g., "Planned," "In Progress," "Active," "Paused," "Retired."
    - **API Endpoint URL:** (Text input)

    - **Data Transferred:** (Multi-line text area or checklist) E.g., "Hours Worked, Salary, Bank Details, Tax Information."
    - **Integration Frequency:** (Dropdown) E.g., "Daily," "Weekly," "Bi-Weekly," "Monthly."
    - **Payroll Integration Contact:** (Text input or dropdown)
    - **Last Sync/Transfer Date:** (Date picker)
    - **Notes:** (Multi-line text area)

3. Background Check APIs

- **Purpose:** To connect with background verification services.
- **Input Fields:**
    - **Background Check Provider:** (Text input or dropdown) E.g., "HireRight," "Checkr," "GoodHire."
    - **API Key/Credentials Status:** (Dropdown) E.g., "Active," "Expired," "Needs Renewal."
    - **Integration Status:** (Dropdown) E.g., "Planned," "In Progress," "Active," "Paused," "Retired."
    - **Services Used:** (Checklist) E.g., "Criminal History," "Employment Verification," "Education Verification," "Drug Screening."
    - **API Documentation Link:** (URL input)
    - **Contact Person:** (Text input or dropdown)
    - **Notes:** (Multi-line text area)

4. Calendar Integration

- **Purpose:** To sync with calendar systems for scheduling.
- **Input Fields:**
    - **Calendar System:** (Dropdown) E.g., "Google Calendar," "Outlook Calendar (Microsoft 365)," "iCal."
    - **Integration Purpose:** (Multi-line text area) E.g., "Scheduling interviews," "Booking meeting rooms," "Team event planning."
    - **Integration Status:** (Dropdown) E.g., "Planned," "In Progress," "Active," "Paused," "Retired."
    - **Account Used for Integration:** (Text input) E.g., "integrations@yourcompany.com."
    - **Data Shared (e.g., availability, event titles):** (Multi-line text area or checklist)
    - **Synchronization Frequency:** (Dropdown) E.g., "Real-time," "Every 15 mins," "Hourly."
    - **Troubleshooting Contact:** (Text input or dropdown)
    - **Notes:** (Multi-line text area)

5. Communication Tools Integration

- **Purpose:** To integrate with Slack, Microsoft Teams, email systems.
- **Input Fields:**
    - **Communication Tool:** (Dropdown) E.g., "Slack," "Microsoft Teams," "Gmail," "Outlook."
    - **Integration Purpose:** (Multi-line text area) E.g., "Notifications for new applications," "Automated team alerts," "Customer support inquiries."
    - **Integration Status:** (Dropdown) E.g., "Planned," "In Progress," "Active," "Paused," "Retired."
    - **API/Webhook URL:** (Text input)
    - **Channels/Groups Affected:** (Text input or multi-select dropdown)
    - **Admin/Creator of Integration:** (Text input or dropdown)
    - **Last Activity Date:** (Date picker)
    - **Notes:** (Multi-line text area)

6. Document Management Integration

- **Purpose:** To connect with document storage and management systems.
- **Input Fields:**
    - **Document Management System:** (Dropdown) E.g., "Google Drive," "SharePoint," "Dropbox," "Box."
    - **Integration Purpose:** (Multi-line text area) E.g., "Storing employee contracts," "Automating document generation," "Accessing policy documents."
    - **Integration Status:** (Dropdown) E.g., "Planned," "In Progress," "Active," "Paused," "Retired."
    - **Authentication Method:** (Dropdown) E.g., "OAuth 2.0," "API Key."
    - **Folders/Permissions Managed:** (Multi-line text area)
    - **Integration Admin:** (Text input or dropdown)
    - **Last Data Sync/Update:** (Date picker)
    - **Notes:** (Multi-line text area)

7. Single Sign-On (SSO) Implementation

- **Purpose:** To implement SSO for a seamless user experience.
- **Input Fields:**
    - **Application/Service Integrated:** (Text input) Which specific application is using SSO.
    - **SSO Provider:** (Dropdown) E.g., "Okta," "Azure AD," "Auth0," "Google Workspace."

- **SSO Protocol:** (Dropdown) E.g., "SAML 2.0," "OAuth 2.0," "OpenID Connect."
- **Implementation Status:** (Dropdown) E.g., "Planned," "In Progress," "Live," "Rollback."
- **Configuration Details (e.g., Redirect URLs, Certificates):** (Multi-line text area) *Note: Sensitive info should be handled securely, perhaps not directly in a basic form.*
- **Date of Deployment:** (Date picker)
- **SSO Contact/Admin:** (Text input or dropdown)
- **Notes:** (Multi-line text area)

8. API Access Management

- **Purpose:** To manage API access and security.
- **Input Fields:**
    - **API Name/Service:** (Text input) E.g., "Employee Data API," "Recruitment API."
    - **API Owner:** (Text input or dropdown) The team or person responsible for the API.
    - **Access Status:** (Dropdown) E.g., "Active," "Deprecated," "Under Review," "Blocked."
    - **Authentication Method:** (Dropdown) E.g., "API Key," "OAuth 2.0," "JWT Tokens."
    - **Authorized Users/Applications:** (Multi-select dropdown or multi-line text area) Who has access.
    - **Access Revocation Policy:** (Multi-line text area) When and how access is removed.
    - **Last Audit Date:** (Date picker) When the access was last reviewed.
    - **Security Notes/Vulnerabilities:** (Multi-line text area)
    - **Notes:** (Multi-line text area)

Mobile & Remote Work Management

1. Mobile HR App

This section focuses on the core mobile application for HR processes.

- **Feature Name:** Mobile HR App
    - **Description Field:** Provide a brief overview of the HR processes to be included in the mobile app (e.g., "Leave requests, payslip access, employee directory").
    - **Priority Field:** How critical is this app? (e.g., High, Medium, Low - dropdown).
    - **Target Users Field:** Who will use this app? (e.g., All Employees, Managers Only, HR Staff - multi-select checkbox).
    - **Key Modules Required Field:** List specific HR modules needed (e.g., Payroll, Leave, Attendance, Performance, Recruitment - multi-select checkbox)

2. Remote Work Monitoring

This section deals with tracking productivity and engagement for remote workers.

- **Feature Name:** Remote Work Monitoring
    - **Description Field:** Explain the primary purpose of monitoring (e.g., "Track hours, monitor project progress, assess engagement levels").
    - **Monitoring Metrics Field:** What specific metrics will be tracked? (e.g., Login/Logout times, Task completion, Application usage, Communication activity - multi-select checkbox).
    - **Privacy Considerations Field:** What are the privacy guidelines or concerns related to monitoring? (text area).
    - **Reporting Frequency Field:** How often should reports be generated? (e.g., Daily, Weekly, Monthly - dropdown).
    - **Approval Process Field:** Who needs to approve the monitoring policies? (text field for "Roles/Departments").

3. Digital Workspace

This is about creating a virtual environment for remote collaboration.

- **Feature Name:** Digital Workspace
    - **Description Field:** What kind of virtual environment is envisioned? (e.g., "Centralized hub for documents, communication, and project management").
    - **Collaboration Tools Field:** Which collaboration tools are essential? (e.g., Chat, Video Conferencing, Document Sharing, Project Management - multi-select checkbox).
    - **Storage Requirements Field:** Estimate the required storage capacity for files and documents (e.g., "GB/TB" with a numerical input).
    - **Access Control Field:** Who will have access, and what levels of access are needed? (text area).
    - **Training Needs Field:** Will users require training to use the digital workspace effectively? (Yes/No radio button).

4. Mobile Approvals

This feature enables approvals of requests and processes from mobile devices.

- **Feature Name:** Mobile Approvals
    - **Description Field:** Which types of requests/processes will require mobile approvals? (e.g., "Leave requests, Expense reports, Purchase orders - multi-select checkbox).
    - **Approval Workflow Field:** Describe the typical approval flow (e.g., "Employee submits -> Manager approves -> HR finalizes" - text area).
    - **Notification Methods Field:** How should approvers be notified of pending approvals? (e.g., Push notification, Email, In-app alert - multi-select checkbox).

5. Location Services

This refers to GPS-based attendance and location tracking.

- **Feature Name:** Location Services
    - **Description Field:** What is the primary purpose of using location services? (e.g., "Attendance tracking, Field staff monitoring, Geo-fencing for specific tasks").
    - **Use Cases Field:** Provide specific scenarios where location tracking will be used (e.g., "Sales team visits, Site inspections" - text area).
    - **Consent Mechanism Field:** How will employee consent for location tracking be obtained and managed? (text area).
    - **Data Retention Policy Field:** How long will location data be stored? (e.g., "Days/Weeks/Months" with a numerical input).
    - **Accuracy Requirements Field:** What level of location accuracy is needed? (e.g., "High, Medium, Low - dropdown or numerical input in meters").

6. Push Notifications

This is about mobile notifications for urgent HR matters.

- **Feature Name:** Push Notifications
    - **Description Field:** What types of urgent HR matters will trigger push notifications? (e.g., "Payroll alerts, Policy updates, Emergency announcements, Leave approvals" - multi-select checkbox).
    - **Target Audience Field:** Who should receive these notifications? (e.g., All Employees, Specific Departments, Individuals - multi-select checkbox).
    - **Notification Triggers Field:** What events will trigger a notification? (text area).
    - **Content Examples Field:** Provide examples of typical notification messages (text area).

7. Offline Capability

This feature allows access to key HR functions without an internet connection.

- **Feature Name:** Offline Capability
    - **Description Field:** Which specific HR functions must be available offline? (e.g., "View payslips, Submit leave requests, Access employee directory, View policies" - multi-select checkbox).
    - **Data Synchronization Field:** How will data be synchronized once an internet connection is restored? (e.g., "Automatic sync, Manual sync, On-demand sync" - dropdown).
    - **Data Security Offline Field:** How will data security be ensured when the app is used offline? (text area).

    - **Storage Limits Offline Field:** Are there any limitations on the amount of data that can be stored offline?

8. Cross-platform Support

This ensures the solution works across iOS, Android, and web platforms.

- **Feature Name:** Cross-platform Support
    - **Description Field:** Confirm the required platforms (e.g., "iOS, Android, Web" - multi-select checkbox).
    - **Specific Versions Field:** Are there specific OS versions or browser versions that must be supported? (e.g., "iOS 15+, Android 12+, Chrome latest, Firefox latest" - text area).
    - **Performance Expectations Field:** What are the performance expectations across different platforms? (e.g., "Fast loading, Smooth navigation" - text area).
    - **Responsive Design Field:** Is responsive design critical for all platforms and devices? (Yes/No radio button).

Security & Data Protection

1. Data Encryption

This section focuses on protecting sensitive HR data through encryption.

- **Feature Name:** Data Encryption
    - **Description Field:** Briefly explain what sensitive HR data needs encryption (e.g., "Payroll information, employee personal details, performance reviews").
    - **Encryption Type Field:** What type of encryption is required? (e.g., "End-to-end, At-rest, In-transit" - multi-select checkbox).
    - **Data Scope Field:** Specify which data sets or modules require encryption (e.g., "All HR data, specific modules like payroll or benefits" - text area).
    - **Key Management Field:** How will encryption keys be managed and secured? (text area).
    - **Compliance Requirements Field:** Are there specific regulations (e.g., GDPR, HIPAA) that dictate encryption standards? (text area).

2. Access Control

This is about managing who can access what information based on their role.

- **Feature Name:** Access Control
    - **Description Field:** Explain the primary purpose of access control (e.g., "Ensure only authorized personnel can view/modify specific HR data").
    - **Access Levels Field:** Define the different levels of access (e.g., "View only, Edit, Admin, Restricted" - dropdown).

- **Role-Based Permissions Field:** List key roles and the type of access they should have (e.g., "HR Manager: Full access to all modules; Employee: View own data only" - text area, possibly with a table format if a more complex form).
- **Authentication Methods Field:** How will users authenticate? (e.g., "Password, Multi-factor Authentication (MFA), SSO (Single Sign-On)" - multi-select checkbox).
- **Review Frequency Field:** How often should access permissions be reviewed and updated? (e.g., "Monthly, Quarterly, Annually, On change of role" - dropdown).

3. Audit Logging

This section covers the comprehensive recording of all HR system activities.

- **Feature Name:** Audit Logging
  - **Description Field:** What types of HR system activities need to be logged? (e.g., "User logins/logouts, data modifications, access attempts, system configurations").
  - **Log Data Points Field:** What specific information should be captured in each log entry? (e.g., "Timestamp, User ID, Action, Data accessed/modified, IP Address" - multi-select checkbox).
  - **Log Retention Policy Field:** How long should audit logs be stored? (e.g., "6 months, 1 year, 7 years" - dropdown or numerical input).
  - **Log Accessibility Field:** Who needs access to audit logs and for what purpose? (text area).
  - **Alert Triggers Field:** What unusual activities should trigger an immediate alert? (text area).

4. Data Backup

This is about automated backup and disaster recovery procedures.

- **Feature Name:** Data Backup
  - **Description Field:** What data needs to be backed up? (e.g., "All HR system data, configurations, user accounts").
  - **Backup Frequency Field:** How often should data backups occur? (e.g., "Daily, Hourly, Weekly, Continuous" - dropdown).
  - **Backup Storage Location Field:** Where will backups be stored? (e.g., "On-site, Off-site, Cloud" - multi-select checkbox).
  - **Disaster Recovery Plan Field:** Outline the steps for data recovery in case of a disaster (text area).
  - **Recovery Time Objective (RTO) Field:** What is the maximum acceptable downtime for the HR system? (e.g., "Hours, Minutes, Days" with a numerical input).
  - **Recovery Point Objective (RPO) Field:** What is the maximum acceptable data loss in case of a disaster? (e.g., "Hours, Minutes, Days" with a numerical input).

5. Privacy Controls

This section focuses on managing employee data privacy and consent.

- **Feature Name:** Privacy Controls
    - **Description Field:** How will employee data privacy be managed? (e.g., "Mechanisms for consent, data access requests, right to be forgotten").
    - **Consent Management Field:** How will employee consent for data processing be obtained and recorded? (text area).
    - **Data Access Request Field:** How will employees request access to their personal data? (text area).
    - **Right to Erasure Field:** How will "right to be forgotten" requests be handled? (text area).
    - **Privacy Policy Link Field:** Provide a link or description of the HR system's privacy policy (text input).

6. Security Monitoring

This is about real-time security monitoring and threat detection.

- **Feature Name:** Security Monitoring
    - **Description Field:** What aspects of the HR system will be continuously monitored? (e.g., "Network traffic, system logs, user behavior, unusual activity").
    - **Threat Detection Methods Field:** What methods will be used for threat detection? (e.g., "Signature-based, Anomaly detection, AI/ML-driven" - multi-select checkbox).
    - **Alerting System Field:** How will security alerts be generated and escalated? (e.g., "Email, SMS, Dashboard, SIEM integration" - multi-select checkbox).
    - **Security Team Contact Field:** Who is responsible for reviewing and responding to security alerts? (text input for "Team/Contact Person").
    - **Monitoring Frequency Field:** Is monitoring continuous or periodic? (e.g., "24/7, Business Hours, Daily Checks" - dropdown).

7. Compliance Reporting

This involves generating compliance reports for data protection regulations.

- **Feature Name:** Compliance Reporting
    - **Description Field:** Which data protection regulations need to be supported by reporting? (e.g., "GDPR, CCPA, HIPAA, local labor laws" - multi-select checkbox).
    - **Report Types Field:** What types of compliance reports are needed? (e.g., "Data access logs, consent records, data breach reports, audit trails" - multi-select checkbox).
    - **Reporting Frequency Field:** How often should compliance reports be generated? (e.g., "Monthly, Quarterly, Annually, On demand" - dropdown).

8. Incident Response

This refers to automated incident detection and response procedures.

- **Feature Name:** Incident Response
    - **Description Field:** Briefly describe the scope of automated incident response (e.g., "Automated actions upon detection of security incidents").
    - **Detection Triggers Field:** What types of incidents will trigger an automated response? (e.g., "Unauthorized access attempts, malware detection, data exfiltration attempts" - text area).
    - **Automated Actions Field:** What automated actions should be taken in response to an incident? (e.g., "Isolate affected systems, Block IP addresses, Disable user accounts, Notify security team" - multi-select checkbox).
    - **Escalation Protocol Field:** Describe the human escalation process for incidents that require manual intervention (text area).
    - **Post-Incident Analysis Field:** Will there be a process for post-incident analysis and reporting? (Yes/No radio button).

Vendor & Contract Management

1. Vendor Database

This section focuses on managing comprehensive vendor information.

- **Feature Name:** Vendor Database
    - **Description Field:** What kind of vendor information needs to be stored?
    - **Key Data Points Field:** List specific fields needed for each vendor record
    - **Integration Needs Field:** Will this database integrate with other systems (e.g., accounting, procurement)? If yes, specify
    - **Access Levels Field:** Who needs access to the vendor database and what level of access? (e.g., "View Only, Edit, Admin" - dropdown for each role like Procurement, Finance, HR).

2. Contract Lifecycle

This is about end-to-end contract management and tracking.

- **Feature Name:** Contract Lifecycle
    - **Description Field:** What are the main stages of the contract lifecycle that need to be managed? (e.g., "Creation, Negotiation, Approval, Execution, Management, Renewal/Termination").
    - **Contract Types Field:** What types of contracts will be managed? (e.g., "Service Agreements, NDAs, Consulting Contracts, Software Licenses" - multi-select checkbox).

    - **Key Contract Dates Field:** What critical dates need tracking? (e.g., "Start Date, End Date, Renewal Date, Notice Period Date" - date picker for each).
    - **Workflow Automation Field:** Are there specific approval workflows or automated tasks needed for contracts? (text area, e.g., "Automated routing for legal review, digital signatures").
    - **Document Storage Field:** How should contract documents be stored and organized?

3. Vendor Performance

This feature involves monitoring and evaluating vendor performance.

- **Feature Name:** Vendor Performance
    - **Description Field:** What is the primary goal of monitoring vendor performance?
    - **Key Performance Indicators (KPIs) Field:** List specific metrics to track vendor performance
    - **Evaluation Frequency Field:** How often will vendor performance be evaluated?
    - **Feedback Mechanism Field:** How will internal teams provide feedback on vendors?
    - **Performance Reporting Field:** What kind of reports are needed for vendor performance?

4. Procurement Management

This focuses on handling HR-related procurement processes.

- **Feature Name:** Procurement Management
    - **Description Field:** What HR-related procurement processes need to be managed?
    - **Requisition Process Field:** Describe the process for creating and approving procurement requisitions (text area).
    - **Vendor Selection Criteria Field:** What criteria are used to select vendors for HR services/products?
    - **Budget Tracking Field:** How will procurement budgets for HR be tracked and managed? (text area).
    - **Purchase Order (PO) Management Field:** Is there a need to generate and track purchase orders? (Yes/No radio button).

---

5. Service Level Agreements (SLAs)

This involves managing SLAs with external service providers.

- **Feature Name:** Service Level Agreements (SLAs)
    - **Description Field:** What is the main purpose of managing SLAs? (e.g., "Ensure service providers meet agreed-upon performance standards").

    - **Key SLA Metrics Field:** List critical metrics to track within SLAs
    - **Penalty Clauses Field:** How will non-compliance with SLAs be addressed?
    - **Monitoring Tools Field:** What tools or methods will be used to monitor SLA adherence? (text area).
    - **Reporting Requirements Field:** What kind of SLA reports are needed? (e.g., "Performance Dashboards, Compliance Reports" - text area).

---

6. Cost Management

This is about tracking and optimizing vendor-related costs.

- **Feature Name:** Cost Management
    - **Description Field:** What types of vendor-related costs need to be tracked and optimized?
    - **Budget Allocation Field:** How will costs be allocated to different departments or projects? (text area).
    - **Cost Tracking Mechanisms Field:** What methods will be used to track expenses?
    - **Cost Optimization Strategies Field:** What strategies are planned for optimizing vendor costs?
    - **Reporting Field:** What cost reports are essential?

7. Compliance Tracking

This feature ensures vendor compliance with regulations.

- **Feature Name:** Compliance Tracking
    - **Description Field:** Which regulations or internal policies must vendors comply with?
    - **Compliance Documentation Field:** What compliance documents need to be collected and managed from vendors?
    - **Compliance Verification Field:** How will vendor compliance be verified?
    - **Risk Assessment Field:** How will compliance risks associated with vendors be assessed and mitigated? (text area).
    - **Alerts/Notifications Field:** When should alerts be triggered regarding compliance issues? (text area).

8. Renewal Management

This involves automated contract renewal notifications and processes.

- **Feature Name:** Renewal Management
    - **Description Field:** What is the primary goal of renewal management?

    - **Notification Timelines Field:** When should renewal notifications be sent out
    - **Renewal Decision Process Field:** Describe the workflow for making renewal decisions
    - **Automated Actions Field:** What automated actions should occur
    - **Responsible Parties Field:** Who is responsible for managing renewals for specific contracts/vendors? (text input for "Role/Department")

Strategic Planning & Forecasting

1. Workforce Planning

This section focuses on strategic workforce planning and forecasting.

- **Feature Name:** Workforce Planning
    - **Description Field:** Briefly explain the primary goal of workforce planning
    - **Planning Horizon Field:** What is the planning timeframe?
    - **Key Data Inputs Field:** What data is needed for workforce planning?
    - **Output Reports Field:** What kind of reports are expected from workforce planning?
    - **Integration Needs Field:** Will this integrate with HRIS or other systems? (Yes/No radio button, then a text field for "Specify Systems").

2. Budget Planning

This covers HR budget planning and allocation.

- **Feature Name:** Budget Planning
    - **Description Field:** What is the scope of HR budget planning?
    - **Budget Categories Field:** List key budget categories to track
    - **Planning Frequency Field:** How often will budget planning occur?
    - **Approval Workflow Field:** Describe the process for budget approval
    - **Variance Tracking Field:** Is tracking actual spend against budget important? (Yes/No radio button).

3. Scenario Modeling

This involves modeling different scenarios for strategic planning.

- **Feature Name:** Scenario Modeling
    - **Description Field:** Explain the primary purpose of scenario modeling
    - **Key Variables Field:** What variables will be adjusted in scenarios? (e.g., "Economic growth, technological disruption, talent availability, regulatory changes" - text area).
    - **Scenarios to Model Field:** Provide examples of scenarios to simulate

    - **Impact Metrics Field:** What metrics will be used to evaluate the impact of scenarios? (e.g., "Headcount, cost, skill gaps, productivity" - multi-select checkbox).

4. Resource Optimization

This focuses on optimizing HR resource allocation and utilization.

- **Feature Name:** Resource Optimization
    - **Description Field:** What HR resources need to be optimized? (e.g., "HR staff, budget, tools, training programs").
    - **Optimization Goals Field:** What are the key goals for optimization? (e.g., "Reduce costs, improve efficiency, enhance employee experience" - text area).
    - **Resource Allocation Criteria Field:** What criteria will be used to allocate resources? (e.g., "Strategic priority, ROI, urgency, skill availability" - multi-select checkbox).
    - **Reporting Needs Field:** What kind of reports are needed to show resource utilization and efficiency? (e.g., "Utilization rates, cost per HR service, project progress" - text area).

5. Market Analysis

This involves analyzing market trends for HR strategy.

- **Feature Name:** Market Analysis
    - **Description Field:** What market trends are important to analyze for HR? (e.g., "Labor market trends, salary benchmarks, industry growth, emerging job roles").
    - **Data Sources Field:** Where will market data come from? (e.g., "Government reports, industry associations, consulting firms, job boards" - multi-select checkbox).
    - **Analysis Frequency Field:** How often should market analysis be conducted? (e.g., "Quarterly, Annually, On-demand" - dropdown).
    - **Key Insights Field:** What specific insights are expected from market analysis? (e.g., "Talent shortages, competitive compensation, new skill demands" - text area).

6. ROI Analysis

This covers calculating ROI for HR initiatives and programs.

- **Feature Name:** ROI Analysis
    - **Description Field:** Which types of HR initiatives will undergo ROI analysis? (e.g., "Training programs, new HR technology, wellness programs, recruitment campaigns").
    - **Metrics for ROI Field:** What metrics will be used to calculate ROI? (e.g., "Productivity gains, turnover reduction, cost savings, employee engagement scores, revenue impact" - multi-select checkbox).
    - **Calculation Methodology Field:** How will ROI be calculated? (e.g., "Standard ROI formula, specific internal model" - text area).

    - **Reporting Frequency Field:** How often should ROI reports be generated? (e.g., "After program completion, Quarterly, Annually" - dropdown).

7. Competitive Analysis

This is about benchmarking against competitors for HR practices.

- **Feature Name:** Competitive Analysis
    - **Description Field:** What aspects of competitor HR practices will be analyzed? (e.g., "Compensation, benefits, talent acquisition strategies, learning and development, company culture").
    - **Competitors to Track Field:** List specific competitors to benchmark against (text area).
    - **Data Collection Methods Field:** How will competitive data be collected? (e.g., "Public reports, industry surveys, networking, specialized tools" - multi-select checkbox).
    - **Analysis Frequency Field:** How often will competitive analysis be updated? (e.g., "Annually, Bi-annually" - dropdown).
    - **Key Learnings Field:** What actionable insights are expected from competitive analysis? (e.g., "Best practices to adopt, areas for improvement, unique selling propositions" - text area).

---

8. Future Skills Mapping

This focuses on identifying future skill requirements and gaps.

- **Feature Name:** Future Skills Mapping
    - **Description Field:** Explain the goal of future skills mapping (e.g., "Proactively identify skills needed for future business success and current skill gaps").
    - **Drivers of Future Skills Field:** What factors will influence future skill needs? (e.g., "Technological advancements, industry changes, market demands, strategic initiatives" - multi-select checkbox).
    - **Skill Categories Field:** What types of skills will be mapped?
    - **Gap Analysis Methodology Field:** How will skill gaps be identified?
    - **Development Plans Field:** How will identified skill gaps be addressed? (e.g., "Training programs, upskilling, reskilling, recruitment strategies" - text area).

Technical Implementation Stack

Frontend Technologies

1. React.js 18+ with TypeScript for Type Safety

This item refers to using React.js with TypeScript for robust code.

- **Technology:** React.js 18+ with TypeScript
    - **Description Field:** Briefly explain why this combination is chosen (e.g., "Leveraging modern React features and ensuring code quality through static typing").
    - **React Version Field:** Specify the exact desired React version or range if not strictly 18+ (e.g., "18.x.x" or "Latest stable 18+").
    - **TypeScript Version Field:** Specify the exact desired TypeScript version or range (e.g., "5.x.x" or "Latest stable").
    - **Reason for TypeScript Field:** Why is type safety crucial for this project? (e.g., "Reduce bugs, improve maintainability, enhance developer experience" - multi-select checkbox or text area).
    - **Developer Experience Impact Field:** How does this choice impact developer onboarding and productivity? (text area).

2. Redux Toolkit for Complex State Management

This section is about managing application data effectively using Redux Toolkit.

- **Technology:** Redux Toolkit
    - **Description Field:** Explain the need for complex state management (e.g., "Managing global application state, handling asynchronous data flows, ensuring data consistency").
    - **State Management Scope Field:** What parts of the application state will be managed by Redux Toolkit? (e.g., "User authentication, global data, form data, API responses" - multi-select checkbox).
    - **Alternatives Considered Field:** Were other state management libraries considered? If yes, briefly explain why Redux Toolkit was chosen over them (text area).
    - **Developer Familiarity Field:** What is the team's familiarity level with Redux Toolkit? (e.g., "High, Medium, Low, None - requires training" - dropdown).

3. Material-UI or Ant Design for Enterprise UI Components

This item relates to choosing a component library for consistent user interface.

- **Technology:** Material-UI or Ant Design
    - **Description Field:** What is the primary goal of using a UI component library? (e.g., "Ensure consistent look and feel, accelerate development, provide accessible components").

    - **Preferred Library Field:** Which library is preferred? (e.g., "Material-UI", "Ant Design", "Undecided - requires evaluation" - radio button or dropdown).
    - **Reason for Preference Field:** Why is this specific library preferred? (e.g., "Design system alignment, customization flexibility, community support, performance" - text area).
    - **Customization Requirements Field:** What level of customization is expected for the UI components? (e.g., "Minimal theming, extensive custom styles, custom components" - dropdown).
    - **Accessibility Needs Field:** Are there specific accessibility (WCAG) compliance requirements for the UI? (Yes/No radio button, then a text field for "Specify Standards").

4. React Router for Navigation and Routing

This section covers managing different pages and navigation within the application.

- **Technology:** React Router
    - **Description Field:** What is the primary purpose of React Router in this project? (e.g., "Handle client-side navigation, manage URL parameters, protect routes").
    - **Routing Complexity Field:** Describe the expected complexity of routing (e.g., "Simple pages, nested routes, dynamic routes, authenticated routes" - multi-select checkbox).
    - **Auth Integration Field:** How will authentication and authorization integrate with routing? (text area, e.g., "Redirect unauthenticated users, role-based access").
    - **Deep Linking Requirements Field:** Is deep linking (linking directly to specific content within the app) a requirement? (Yes/No radio button).

5. Recharts/D3.js for Advanced Data Visualization

This item specifies libraries for displaying complex data visually.

- **Technology:** Recharts/D3.js
    - **Description Field:** What kind of advanced data visualizations are needed? (e.g., "Complex charts, interactive dashboards, custom graphs").
    - **Preferred Library Field:** Which library is preferred? (e.g., "Recharts", "D3.js", "Both", "Undecided - requires evaluation" - radio button or dropdown).
    - **Reason for Preference Field:** Why is this library preferred? (e.g., "Ease of use, flexibility for custom visualizations, performance with large datasets" - text area).
    - **Visualization Examples Field:** Provide examples or types of charts/graphs needed (e.g., "Heatmaps, network graphs, custom bar charts, real-time dashboards" - text area).
    - **Interactivity Requirements Field:** What level of interactivity is needed for the visualizations? (e.g., "Tooltips, zooming, filtering, drill-downs" - multi-select checkbox).

6. React Hook Form for Efficient Form Handling

This section is about managing user input forms efficiently.

- **Technology:** React Hook Form
    - **Description Field:** What is the main benefit of using React Hook Form for this project?
    - **Form Complexity Field:** Describe the complexity of forms in the application (e.g., "Simple contact forms, multi-step forms, forms with dynamic fields, forms with complex validation" - multi-select checkbox).
    - **Validation Requirements Field:** What kind of validation is needed? (e.g., "Basic required fields, regex patterns, custom validation rules, asynchronous validation" - multi-select checkbox).
    - **Integration with State Management Field:** How will form data integrate with the chosen state management solution (Redux Toolkit)? (text area).
    - **Error Handling Field:** How should form errors be displayed and handled? (text area)

Backend Integration: Input Fields Explained

RESTful API Architecture for All HR Operations

- **Input Fields:**
    - **Base API URL (Text Input):** Where the HR system's "mailboxes" are located on the internet
    - **API Key/Secret (Text Input, Hidden):** A special code that identifies your system to the HR API. It's like a secret password to access the mailboxes.
    - **API Version (Dropdown/Text Input):** If there are different versions of the HR API, you might need to specify which one you're using (e.g., v1, v2).

Real-time WebSocket Connections for Live Updates

This is like a direct, open phone line for instant communication, great for things like live chat or immediate notifications.

- **Input Fields:**
    - **WebSocket Server URL (Text Input):** The address of the server that handles these real-time connections
    - **Event Subscriptions (Multi-select/Checkbox List):** What kind of "live updates" do you want to receive? This lets you pick which "phone calls" you want to get.
    - **Reconnect Attempts (Number Input):** How many times should the system try to reconnect if the live connection drops? (e.g., 5).

GraphQL for Efficient Data Fetching

GraphQL lets you ask for *exactly* the data you need, no more, no less. It's like ordering only the specific dishes you want from a menu, instead of a fixed combo meal.

- **Input Fields:**
    - **GraphQL Endpoint URL (Text Input):** The address where your system can send its specific data requests
    - **Query Builder (Visual/Text Area):** This isn't a simple input field but a tool where you'd "build" your data request. Imagine dragging and dropping the data points you want or typing a specific query.
    - **Schema Definition File (File Upload/Text Area):** This defines what data is available and how it's structured. It's like providing the restaurant's menu so you know what you can order.

File Upload and Document Management APIs

This handles storing and organizing documents, like employee contracts or performance reviews.

- **Input Fields:**
    - **Storage Location (Dropdown/Text Input):** Where should the files be stored?
    - **Maximum File Size (Number Input):** What's the largest file allowed to be uploaded? (e.g., 25 MB).
    - **Allowed File Types (Multi-select/Text Input):** Which types of files can be uploaded? (e.g., "PDF," "DOCX," "JPG").
    - **Retention Policy (Number Input/Dropdown):** How long should documents be kept? (e.g., "7 years," "Indefinite").

Authentication and Authorization with JWT

Authentication is about verifying who you are (your identity), and **authorization** is about what you're allowed to do. JWT (JSON Web Token) is a secure way to confirm this. Think of JWT as a secure, tamper-proof ID card.

- **Input Fields:**
    - **JWT Secret Key (Text Input, Hidden):** A highly confidential key used to sign and verify the JWTs. This is like the unique signature on your ID card that proves it's real.
    - **Token Expiration Time (Number Input/Dropdown):** How long should a user's "ID card" (JWT) be valid before they need a new one? (e.g., "1 hour," "8 hours").
    - **Allowed Issuers (Text Input/List):** Which systems or services are allowed to issue these "ID cards"? (e.g., yourcompany.com).
    - **Audience (Text Input/List):** For whom are these "ID cards" intended? (e.g., hr-app, admin-portal).

Database Integration with Complex Queries and Joins

This is how the system stores and retrieves all its information. "Complex queries and joins" mean it can pull together information from different parts of the database.

- **Input Fields:**
    - **Database Type (Dropdown):** What kind of database is it? (e.g., "MySQL," "PostgreSQL," "MongoDB").
    - **Database Host/Server (Text Input):** The address of the database server (e.g., db.yourcompany.com).
    - **Database Name (Text Input):** The specific name of the database to connect to (e.g., hr_data).
    - **Database Username (Text Input):** The username to log in to the database.
    - **Database Password (Text Input, Hidden):** The password for the database user.
    - **Connection Pool Size (Number Input):** How many simultaneous connections can the application make to the database? (e.g., 10). This is like setting how many open lanes there are to the database "highway."

Performance & Scalability

Code Splitting for Optimal Bundle Sizes

- **Minimum Module Size for Splitting (Number Input):** How small should a piece of code be before it's considered for splitting? (e.g., 20 KB). If a code chunk is smaller than this, it might just be included in the main bundle. This helps avoid creating too many tiny files.
- **Maximum Chunks (Number Input):** What's the maximum number of code pieces you want to create? (e.g., 50). This prevents the application from creating an overwhelming number of small files, which can sometimes have its own overhead.
- **Vendor Code Splitting (Checkbox):** Should common third-party code (like libraries) be separated into their own bundle? (e.g., ☑ Enable). This is useful because library code often doesn't change, so it can be cached by the user's browser.

Lazy Loading for Large Datasets

Lazy loading means that parts of the data or content are only loaded when they're actually needed, not all at once. Think of it like a newspaper that only prints the articles you click on, instead of delivering the entire edition at your door every time you want to read one story.

- **Input Fields:**
    - **Threshold for Lazy Load (Number Input):** How many items in a list or how much data should be present before lazy loading kicks in? (e.g., 50 items, 2 MB). Below this, all data might be loaded immediately.
    - **Loading Spinner/Placeholder (Dropdown/Text Input):** What should the user see while data is loading? (e.g., "Show spinning wheel," "Display 'Loading...' text," "Use skeleton placeholder").
    - **Preload Distance (Number Input):** How far ahead (e.g., in pixels or items) should the system start loading data before the user actually scrolls to it? (e.g., 200 pixels). This makes the experience smoother.

Virtual Scrolling for Handling Large Lists

Virtual scrolling is a technique for displaying very long lists (like thousands of items) efficiently. Instead of rendering all items at once, it only renders the ones currently visible on the screen, plus a few above and below. It's like having a window that moves over a very long scroll of paper, only showing you what's directly in front of the window.

- **Input Fields:**
    - **Viewport Height (Number Input):** What's the approximate height of the area where the list is displayed? (e.g., 400 pixels). This helps the system calculate how many items can be shown at once.
    - **Buffer Items (Number Input):** How many extra items (above and below the visible area) should be rendered? (e.g., 5). This creates a smoother scrolling experience by pre-rendering items that are about to come into view.
    - **Item Height (Number Input):** If all items in the list have a consistent height, specifying it helps with accurate scrolling calculations. (e.g., 40 pixels).

Progressive Web App (PWA) Capabilities

PWAs are websites that can act like native apps, offering features like offline access, push notifications, and installation on the home screen.

- **Input Fields:**
    - **Offline Mode (Checkbox):** Should the app work when there's no internet connection? (e.g., ☑ Enable Offline Mode).
    - **Push Notifications (Checkbox):** Should the app be able to send notifications to users even when it's closed? (e.g., ☑ Enable Push Notifications).
    - **Installable (Checkbox):** Can users add the app to their home screen like a regular app? (e.g., ☑ Make Installable).
    - **App Icon (File Upload):** Upload the icon that will appear on the user's home screen.

    - **Start URL (Text Input):** Which page should the PWA open to when launched from the home screen? (e.g., /dashboard).

Caching Strategies for Frequently Accessed Data

Caching means storing copies of data that are accessed often, so they can be retrieved quickly without having to go all the way back to the original source. It's like keeping your most-used tools right next to you instead of walking to the shed every time.

- **Input Fields:**
    - **Cache Duration (Number Input/Dropdown):** How long should data remain in the cache before it's considered old and needs to be re-fetched? (e.g., 5 minutes, 1 hour).
    - **Cache Size Limit (Number Input):** What's the maximum amount of data (e.g., in MB or number of items) that can be stored in the cache? (e.g., 100 MB).
    - **Cache Invalidation Policy (Dropdown):** When should cached data be removed or refreshed? (e.g., "On data update," "After a fixed time," "Manual").
    - **Data Types to Cache (Multi-select/Checkbox List):** Which specific types of data should be cached? (e.g., "User profiles," "Product catalog," "Configuration settings").

Database Indexing and Query Optimization

This is about making the database searches super fast. **Indexing** is like creating an alphabetical index in a book, so you can quickly find specific information without reading the whole book. **Query optimization** is about finding the most efficient way to ask the database for information.

- **Input Fields (These would typically be for developers/DBAs, not end-users):**
    - **Index Creation (Code/Configuration Editor):** This wouldn't be a simple input field but a place where a developer defines which columns in the database should have indexes.
    - **Query Performance Monitoring Threshold (Number Input):** What's the maximum acceptable time for a database query? If a query takes longer, it flags it for review. (e.g., 500 ms).
    - **Slow Query Log (Checkbox):** Should the system record queries that take too long? (e.g., ☑ Enable Slow Query Logging).
    - **Optimization Recommendations (Read-only Display):** The system might analyze queries and suggest indexes or query rewrites. This isn't an input but an output based on performance monitoring.

Load Balancing for High Availability

Load balancing distributes incoming user requests across multiple servers. If one server gets too busy or goes down, others can pick up the slack. It's like having multiple cashiers at a store, so customers don't have to wait in one long line.

- **Input Fields:**
    - **Number of Servers (Number Input):** How many servers are available to handle requests? (e.g., 3).
    - **Load Balancing Algorithm (Dropdown):** How should requests be distributed? (e.g., "Round Robin" (distribute evenly), "Least Connections" (send to the least busy server)).
    - **Health Check Interval (Number Input):** How often should the load balancer check if a server is healthy and responding? (e.g., 10 seconds).
    - **Sticky Sessions (Checkbox):** Should a user always be sent to the same server once their session starts? (e.g., ☑ Enable Sticky Sessions). This can be important for some applications to maintain user state.
    - **Fallback Server (Text Input/Dropdown):** If all primary servers are down, is there a designated "backup" server to handle essential requests?

Security Implementation

HTTPS/TLS Encryption for All Communications

This is like putting all your communication in a secure, encrypted envelope so no one can snoop on it while it travels across the internet. HTTPS is the secure version of HTTP, and TLS is the technology that provides the encryption.

- **Input Fields:**
    - **SSL/TLS Certificate (File Upload):** You'd upload the digital "identity card" (certificate) for your website. This certificate proves your website is legitimate and allows for secure connections.
    - **Private Key (File Upload):** This is the secret key that matches your certificate, like the key to unlock your encrypted envelope. It must be kept very secure.
    - **Minimum TLS Version (Dropdown):** Which version of the encryption standard should be used? (e.g., TLS 1.2, TLS 1.3). Newer versions are more secure.
    - **HTTPS Redirection (Checkbox):** Should all unsecure (HTTP) connections automatically be redirected to secure (HTTPS) ones? (e.g., ☑ Force HTTPS).

OAuth 2.0 and OpenID Connect for Authentication

These are modern ways to let users log in using existing accounts (like Google, Facebook, or a company's internal system) without giving your app their password. OAuth 2.0 is for authorization (what you're allowed to do), and OpenID Connect builds on it for authentication (who you are).

- **Input Fields (for setting up your app to use these services):**
    - **OAuth Provider (Dropdown/Text Input):** Which service are you using for login? (e.g., Google, Microsoft Azure AD, Custom Identity Provider).
    - **Client ID (Text Input):** A unique identifier for your application, provided by the OAuth provider. It's like your app's public name to the login service.
    - **Client Secret (Text Input, Hidden):** A secret key for your application, also provided by the OAuth provider. This is your app's private password for communicating with the login service.
    - **Redirect URIs (Text Area/List):** A list of URLs where the OAuth provider should send the user back to after they've logged in. This prevents phishing.
    - **Scopes (Multi-select/Text Area):** What kind of information or permissions does your app need from the user? (e.g., profile, email, read_calendar).

Role-based Access Control (RBAC) Implementation

RBAC means that what a user can do in the application depends on their "role" (e.g., "Admin," "HR Manager," "Employee"). It's like having different keys for different doors in a building.

- **Input Fields:**
    - **Define Roles (Text Input/List Builder):** Create and name the different roles in your system (e.g., Admin, Manager, Staff).
    - **Assign Permissions to Roles (Checkboxes/Multi-select):** For each role, select which actions they are allowed to perform (e.g., Admin can "Create User," "Delete Data"; Staff can "View Profile," "Submit Leave Request").
    - **Assign Users to Roles (User Picker/Dropdown):** Select which users belong to which roles (e.g., "John Doe" is Manager, "Jane Smith" is Staff).

SQL Injection and XSS Protection

These are defenses against common web attacks:

- **SQL Injection:** An attacker tries to trick your database into revealing or changing data by inserting malicious code into input fields.
- **XSS (Cross-Site Scripting):** An attacker injects harmful scripts (like JavaScript) into web pages viewed by other users, which can steal data or deface the website.
- **Input Fields (These are mostly internal configurations for developers, not end-users):**

- **Input Sanitization Rules (Configuration File/Settings):** Define what characters or patterns are not allowed in user inputs, or how they should be "cleaned up." (e.g., "Disallow <script> tags," "Escape single quotes").
- **Output Encoding Rules (Configuration File/Settings):** Specify how data retrieved from the database should be displayed to prevent harmful scripts from running in the user's browser.
- **Content Security Policy (CSP) Directives (Text Area):** A list of rules that tell the browser what external resources (scripts, images, fonts) are allowed to be loaded, preventing malicious injections. (e.g., script-src 'self' https://trusted.cdn.com;).

CSRF Token Implementation

CSRF (Cross-Site Request Forgery) is an attack where an attacker tricks a user into performing an unintended action on a website where they are logged in (e.g., making a purchase or changing a password). CSRF tokens are like a secret, one-time code that the website expects with every important request to ensure it's truly coming from the legitimate user.

- **Input Fields (Internal settings):**
  - **Enable CSRF Protection (Checkbox):** Turn this security feature on or off (e.g., ☑ Enable CSRF Protection).
  - **Token Expiration Time (Number Input):** How long should a CSRF token be valid? (e.g., 2 hours).
  - **Token Generation Method (Dropdown):** How are these unique tokens created? (usually handled by the framework).

Rate Limiting and DDoS Protection

These protect your application from being overwhelmed by too many requests.

- **Rate Limiting:** Limits how many requests a single user or IP address can make within a certain time frame.
- **DDoS (Distributed Denial of Service) Protection:** Defends against attacks where many compromised computers flood your system with traffic to make it unavailable.
- **Input Fields:**
  - **Requests Per Minute (Number Input):** How many requests are allowed from a single IP address within one minute? (e.g., 60 requests).
  - **Block Duration (Number Input/Dropdown):** How long should an IP address be blocked if it exceeds the rate limit? (e.g., 15 minutes, 1 hour).
  - **Whitelist IPs (Text Area/List):** A list of IP addresses that should *not* be subject to rate limiting (e.g., internal network IPs).

- **DDoS Protection Service Integration (Text Input/Dropdown):** If using an external DDoS protection service (like Cloudflare), you might input API keys or configuration details for that service.
- **Threshold for Alert (Number Input):** At what level of incoming traffic should an alert be triggered? (e.g., 10,000 requests/second).

Regular Security Audits and Penetration Testing

These aren't directly about "input fields" for the application itself but are crucial operational inputs for maintaining security. They involve human actions and external services.

- **Input Fields (for operational planning/tracking):**
  - **Last Audit Date (Date Picker):** When was the last security audit performed?
  - **Next Audit Date (Date Picker):** When is the next security audit planned?
  - **Audit Frequency (Dropdown):** How often should security audits occur? (e.g., "Quarterly," "Annually").
  - **Penetration Testing Vendor (Text Input):** Which company performs the "pen tests" (simulated attacks to find weaknesses)?
  - **Audit Report Upload (File Upload):** A place to store the reports from security audits and penetration tests.
  - **Remediation Plan (Text Area):** A field to describe actions taken to fix issues found during audits.
